TEN MILLION DOLLARS WILL BE SPENT

TO BUILD A SIXTY-NINE MILE STRETCH OF DOUBLE TRACK

By the Chesapeake & Ohio Railroad Company From Sciotoville to Valley Crossing to Connect With the Hocking Valley Railroad—The Company's Tracking Agreement With the Norfolk & Western Railroad Expires In 1927.

Eventual completion of the Nickel Plate merger, now pending before the interstate commerce commission at Washington, will result in added importance attaching to Columbus and central Ohio as a railway center.

Columbus will become an important gateway for the unified system, as soon as the 63 miles of new double tracked roadway from Gregg to Valley Crossing is completed. It will connect the Chesapeake and Ohio with the Hocking Valley.

All of this, of course, is contingent upon the proposal being approved by the commission.

This new line of road will permit movement of tonnage in considerable volume thru Columbus to the Marion gateway, thence over the line of the Erie constituent west to Chicago. The diversion will relieve part of the congestion at Cincinnati where the peculiar topography makes freight operation a perplexing problem.

The Cincinnati business section, situated in a deep valley, is reached by the railroads which enter thru many narrow windings among the hills. It is the only point, outside of Florida, where a serious car shortage occurred during 1925. A daily average shortage of 1172 cars was reported in September, due partly to the increased demand for West Virginia and Kentucky coal, which overtaxes the capacity of the Cincinnati gateway.

With the completion of the 63 mile roadway, Columbus will become a gateway for the north and south traffic to be developed by the Van Swearingen system from Michigan points and Toledo, thru Fostoria, to Elkhorn City, Kentucky, on the Chesapeake and Ohio. Railroad operating men profess to see great possibilities in this route, which is substantially shorter than the route now being used for traffic between Michigan points and Toledo and the south, Van Swearingen officials said.

Over the line thru Columbus will also move tonnage destined for Hampton Roads, which is another point on the system designed for marked development.

The purpose is to make Hampton Roads a larger receiving point for imports, as well as commodities for export overseas. There are also possibilities from the standpoint of grain, moving from Toledo, as well as Michigan products, which can be shipped to Hampton Roads for export.

At present the movement of Chesapeake and Ohio tonnage to the Hocking The Chesapeake and Ohio has only limited trackage rights over this line, the Norfolk and Western movement being so heavy that, to protect its own traffic, it does not obligate itself to take more than 600 loads per day from the Chesapeake and Ohio.

Discretion as to the amount of volume accommodated rests with the Norfolk and Western, which has been liberal in its treatment. The Norfolk & Western management has in the past, urged the Chesapeake and Ohio to provide its own line for handling its traffic, particularly in view of the fact that the present trackage agreement between Waverly and Valley Crossing expires in 1927 and cannot be renewed because of the Norfolk & Western's imperative need for the larger use of its own line because of traffic increase.

The proposed 63 miles of new roadway will have a maximum and limit-

ing grades of 0.5 per cent against southbound movements, which now consist largely of empties, and a maximum and limiting grade of 0.2 per cent northbound, as against the northbound grade of 0.33 per cent over the Norfolk and Western's line. This better grade will enable movement of bituminous in trains of about 8250 gross tons, or about 100 cars each. The movement between terminals will be materially expedited. Motive power requirements will be lower and a more efficient use of freight equipment will result.

The new line is imperative for two reasons, principally. First, it will bridge the only gap in the otherwise continuous operations of the unified system, and, secondly, it will place the road in a position to meet progressively the anticipated increases in coal movement to points north of the Ohio river and to the northwest.

Since 1923, the westbound coal traffic of the Chesapeake and Ohio has increased enormously—136.7 per cent in 1925. Of the Chesapeake and Ohio's coal tonnage about 70 per cent moves to connecting lines. Of this tonnage to connections, all but about 10 per cent moves in approximately equal volume, by way of Cincinnati, and Columbus, to the Great Lakes, the large industrial centers of Michigan, Indiana, northern Ohio and central freight association territory generally, and in small but increasing volume to the northwest.

The capacity of both the Columbus and Cincinnati gateways was reached in 1924. It has been estimated that in the next five to 10 years the movement will reach 4000 cars daily or 60,000,000 tons a year. At least 40,000,000 tons, it is estimated, will move westward—25,000,000 by way of Columbus and 15,000,000 tons by way of Cincinnati. Facilities are, therefore, required for the handling thru the Columbus gateway of an estimated 25,000,000 tons a year.

The new line will shorten the movement between Russell, Kentucky, and Toledo by about 106 miles, as compared with the route thru Cincinnati over the Chesapeake and Ohio constituent and its connections. The estimated cost of construction of the new line is \$10,000,000.

AIDS STOCK RAISER

Dr. Hubert Bunyea of the United States Department of Agriculture, photographed at his microscope with which he is making a study on viruses of animal disease. Doctor Bunyea's work is contributing largely to the protection of one of America's largest industries through developing ways and means to prevent or cure various diseases, including rabies, foot-and-mouth disease, hog cholera, fowl pest, bird pox.

TRUE FABLE CITY.

Denver, celebrating its semi-centennial anniversary of Colorado's admittance to statehood, is known as the Aladdin City, being the youngest community of 300,000 people in the United States.

It's Zero in Popularity Over Here. Income tax publicity likely to be just as popular in France as it has been in the United States—Boston Globe.

Ending of Coal Strike Celebrated by the Miners

Miners in a Pennsylvania town celebrating the settlement of the long anthracite coal strike. This is portrait of Richard F. Grant of Philadelphia, president of the Susquehanna Collieries company, who is credited by both sides with having brought the strike to an end.

HAPPENINGS IN OUR STATE

Taken Direct From Wires By Correspondents of the United States Press Association.

(United Press)

Columbus—The public utilities commission today overruled the petition of the Logan Gas company for a rehearing of the commission's action in striking from the files of the company's second schedule of increased rates.

The company filed the motion a week ago. The commission ruled the new schedule could not be accepted because the company has filed a previous rate schedule which has neither been approved or rejected by the commission. The company was expected to appeal to the supreme court.

Columbus—Radio station WAIU tonight will fire the opening gun of the 1926 enrollment campaign for the Citizens Military Training camps, when Lieutenant Francis W. Glover, Fort Hayes, will tell how young men of 17 to 24 years may take advantage of the camps.

Citizens Military Training camps are to be held this year at both Camp Knox, Kentucky and Fort Benjamin Harrison, Indiana. A third camp will be established for the first time at Fort Thomas, Kentucky. The camps will be operated from July to August.

Columbus—Agricultural production in Ohio is normal, it was rated by State Director of Agriculture Truax today, as regards the major crops. Prospects for Buckeye fruit are above the average, altho definite statistics are not yet available.

Columbus—John S. Schneider, 65, nationally known photographer, who was born in Galion, died yesterday at his residence here. Schneider was vice president of the Baker Art gallery and had been a photographer since 1879 when he first came from Galion.

Columbus—R. B. Ackerman, Galion legislative agent for the Brotherhood of Locomotive Firemen and Engineers, was one of the five men appointed by Governor A. V. Donahey to represent Ohio at the national conference on street and highway safety in Washington March 23 to 25, under the chairmanship of the secretary of commerce.

Cleveland—Alberta Floyd, 20 years old negroess, disappeared today following the shooting of her step-father, Mitchell Smith. The girl disappeared shortly after Smith died. The shooting climaxed a quarrel between Smith and his wife, police said.

HEART FAILURE

Caused Death of Mrs. Henry Metzgar—Was Sister of John J. Brehmer.

Mrs. Mary Metzger, aged 69, widow of Henry Metzgar, died at her home in Columbus, Friday, February 26, of heart failure after an illness of several weeks.

Mrs. Metzger was born in Chillicothe, the daughter of Jacob and Elizabeth Brehmer and resided there until a few years ago when she moved to Columbus to be with her children.

She leaves to mourn their loss two daughters, Mrs. C. W. Pavey, Mrs. Guy Chaffin, one son, John Metzger, all of Columbus. Four brothers, John J. Brehmer of this city; Edward Brehmer, of Portsmouth and Louis and Jacob Brehmer of Chillicothe.

Funeral services were held at her home, 963 Pleasant avenue, Columbus Monday, March 1, at 2:30 o'clock. The body was placed in Amaranth Abbey, Union cemetery.

NEWS ABOUT COURT HOUSE

General Happenings Taken From the Records of the Various County Offices.

Secured Judgment.

B. R. Calvert has secured judgment by confession against Harry Barthelmas and others on a promissory note for \$429.50 at eight per cent from February 27, 1926. I. F. Snyder represents the plaintiff.

To Construe Will.

Meeker Terwilliger executor of John Banister has filed a civil action in common pleas court against Martha Phillips and others asking for the construction of the will of decedent.

HOME AGAIN.

Will G. Hamilton and Harry P. Weimer have arrived home from a visit to New Orleans, Louisiana, and the Mardi Gras. They made the trip by river and enjoyed the novelty of the ride which took them two weeks. They had plenty of eats and river water to drink.

UNDERWENT OPERATION.

Miss Anna Smallwood spent the day in Columbus, visiting her sister, Miss Marie Smallwood, a patient at Mt. Carmel hospital. The latter underwent an operation for goiter, last Friday.

MRS. THOMAS FINNESSEY DEAD.

Mrs. Jennie Amanda Fennessey, 71, died at her residence, 592 Stewart avenue, Columbus, Sunday, following a four months illness of cancer. Besides her husband, Thomas Fennessey, two brothers, Frank Rogers, of this city and William Rogers, of Columbus and one sister, Mrs. Minnie Hickey, of this city survive.

Funeral services will be held at the residence Wednesday afternoon at 2 o'clock. Rev. J. M. Chandler officiating. Burial will be in the Obetz cemetery.

QUARANTINE RAISED.

Health Officer Louis Schneider has raised the quarantine on the homes of Leroy Hampp, York street; Charles Arledge and George Arledge, Clinton street; Orlando Myers and Matthew Smith, Lovers' Lane; Jay Henry, Main and Franklin streets, and Mrs. Minerva Engle, Watt street, and has quarantined the home of Sanford Birchhead, on East Ohio street. The smallpox situation is considerably better and in a short time will be stamped out.

BAR ON HER MEDAL

Mrs. Samuel Burleigh Milton, prominent in national capital society and wife of Major Milton, receiving the silver bar of honor for saving human life, from Miss Lois Thompson, representing the United States coast guard. Last year Mrs. Milton received the Coast Guard silver medal for saving life in 1922, and the bar is awarded for subsequent life saving in 1925 in the Chesapeake bay.

Grenier

GOOD SALE.

The public sale of Mossbarger & Smith held Thursday near Williamsport was very well attended and property brought good prices. The sale amounted to \$4550.

W. O. Bumgarner was the auctioneer and H. W. Campbell, clerk.

RIVALS.

The whispering pine, soft speaker of the hills, is protesting against the radio, loud speaker of the city, in claiming the attention of vacationists in the Colorado Rockies.

SUDDEN DEATH OF HUSBAND AND MOTHER

Lancaster Man Fell on Street and Mother-in-Law Found Dead in Chair.

While Mrs. Edman Thomas of 349 South High street, Lancaster, was selecting a casket Saturday morning for her mother, Mrs. Louisa Hartman 82, who was found dead Friday afternoon sitting in a rocking chair at her home in Stoutsville, Ed. Thomas, 67, the husband of the Lancaster woman, dropped dead on West Main street in front of Reese's drug store Lancaster. Both deaths were caused by heart failure.

Mrs. Hartman, widow of the late Civil war veteran, Galyord Hartman, lived alone. She was seen moving about the premises but a short time before her death was discovered by Miss Jeannette Wenrich.

Mr. Thomas was a well known carpenter. He is survived by the widow, one son, Clyde, manager of the Exide Battery station and a daughter, Mrs. Ray Coss, of Locust street, Lancaster. Mrs. Hartman is survived by two daughters, Mrs. Edward Rieman of Amanda, and Mrs. Edward Thomas, of Lancaster; four sons, George of Columbus, Frank of Clearport, Harry of Canal Winchester and John of San Antonio, Texas. A brother, Thomas Brown, of Kenton and a half sister, Mrs. Carl Walker of Lancaster, also survive.

Funeral services were held Monday from the Stoutsville Reformed church, Rev. J. M. Wenrich officiating. Burial in Maple Hill cemetery.

SHORT ILLNESS

Mrs. W. A. Valentine Passed Away Sunday—Funeral Services Wednesday.

Maria Valentine died at her home in Washington township Sunday evening at 8 o'clock after a short illness.

She was the daughter of Michael and Catherine Vallette Lutz and was born in Fairfield county, April 29, 1846. September 23, 1869, she was united in marriage to William A. Valentine and to this union were born eight children, six of whom are living, namely; Mrs. W. H. Leist, of this city; L. A. Valentine and Wilson E. Valentine, of Washington township; C. D. Valentine, of Amanda; Jennie C. Valentine, at home and Mrs. H. M. Markwood, of Lancaster.

Her husband and two children preceded her in death. She is survived by one sister, Catherine Lutz of Washington township.

She was a member of the Lutheran church and the funeral services will take place from her late residence Wednesday afternoon at 2 o'clock. Rev. G. J. Troutman will officiate. Interment in Forest cemetery.

RACHEL SWEETZ DEAD.

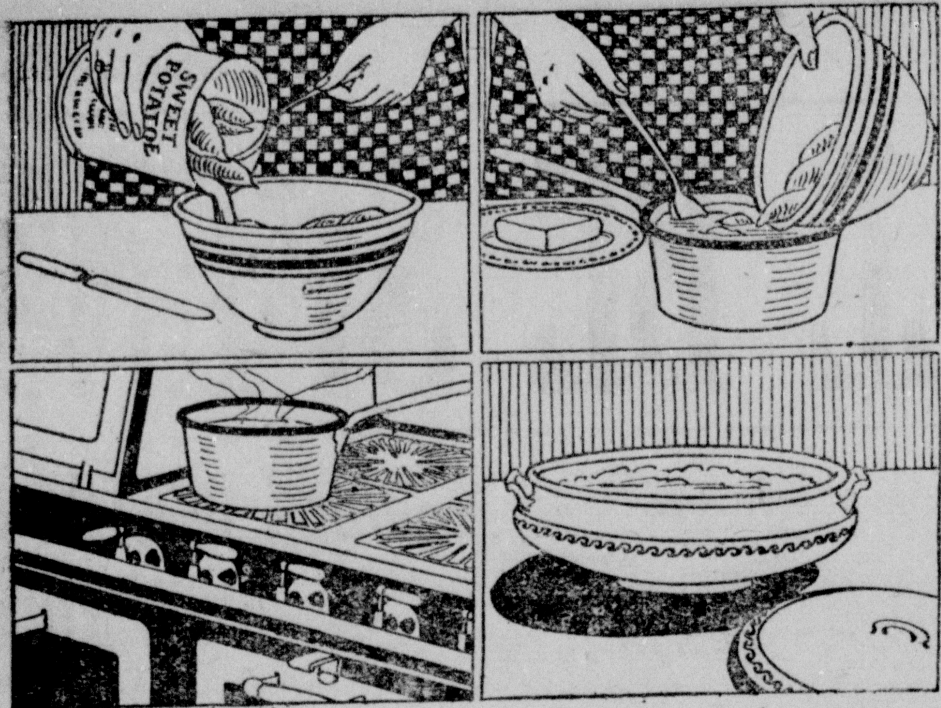

Rachel Sweetz died at the County Home Sunday morning aged 78 years. She was born in Darby township and had been an inmate of the home since October 17, 1916.

The funeral services will be held at the Albaugh chapel Tuesday afternoon at 2:30 o'clock. Rev. George Weir will officiate. Interment will be in Forest cemetery.

PROSPERITY INSURANCE.

A "Prosperity Insurance" campaign to raise \$150,000 for advertising Colorado, thus protecting prosperity thru another 50-million dollar return from tourists this summer, is the unusual method of an "income" subscription drive on behalf of the state by the Denver Tourist bureau, a source of free information on travel.

Quick Dishes From Canned Sweet Potatoes

THE sweet potato has a heart of gold. But that nutritious and delectable tuber, so rich in the carbohydrates, starch and sugar, hides its sweetness beneath an armor which the housewife finds hard to remove. Often she is tempted to forego its delights rather than submit to the tedious task of preparing it for the table. But, once more, modern progress has taken a tiresome job out of her hands. The sweet potato is now put up in ready-to-serve form.

Candied Sweet Potatoes is a popular dish. With the tough skin already removed by machinery, the housewife has only to slice the canned potatoes and prepare the syrup. This is done by boiling slowly for five minutes two cups of sugar and one of water. Add one heaping tablespoon of butter. Into this put the sliced sweet potatoes from a No. 3 can, and let them cook very slowly until the syrup has thickened almost to the consistency of candy.

Sweet Potatoes with Pineapple is another dainty. Slice all the sweet potatoes from one can, add 1/4 pound of butter, one cup sugar, one can crushed pineapple and 1/2 cup water. Bake until the syrup is thick, and serve hot.

Sweet Potato Waffles are delicious. Mash a sufficient number of canned sweet potatoes to make one cupful. Mix with one cup flour, 1/4 cup sugar, 1/2 cup melted butter and one cup milk. Add yolk of one egg well-beaten, and then the white beaten stiff. Cook like other waffles. The remainder of the can may be used for a dish of candied sweet potatoes.

The Evolution of Jack's Bean Stalk

THAT must have been a tough old bean-stalk that permitted Jack to climb to the giant's castle in the clouds. In height it out-distanced the Tower of Babel, which aimed at heaven but never got there.

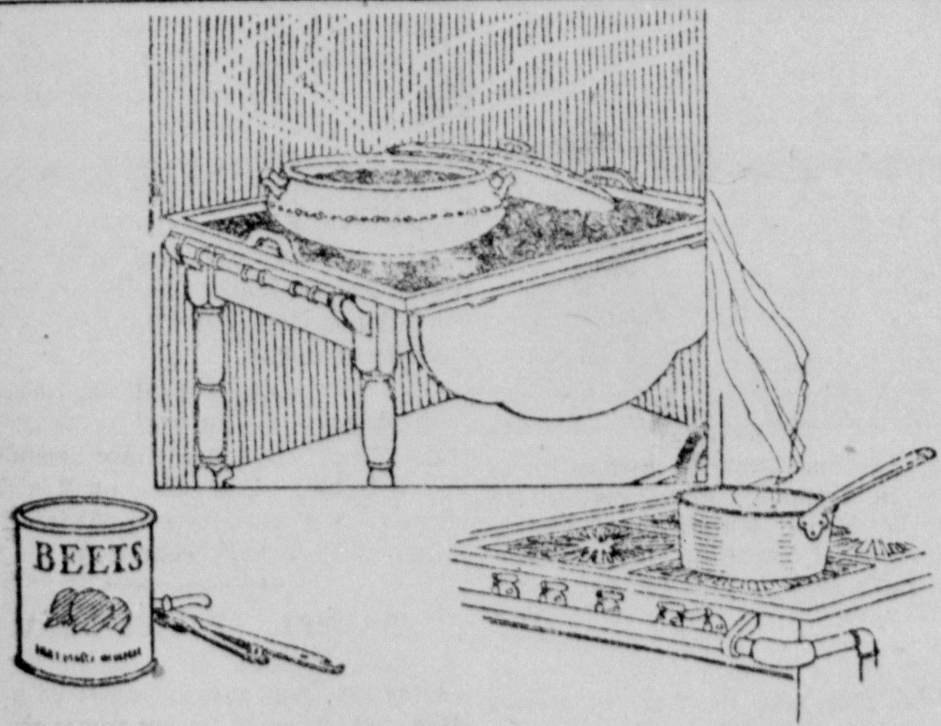

If the stringless beans we have today were as tough as those on Jack's picturesque ladder must have been, they would not be as popular as they are. The modern "stringless bean" is not one of the miracles performed by that wizard of plant life, Luther Burbank, but is an achievement of the canning industry.

Only when she buys them in a can is the housewife able to save herself the trouble of "stringing" beans. The commercial cannery, with its highly perfected equipment, has relieved her of this burden.

Now is the time to eat stringless beans, because of their remarkable cheapness. Owing to the unusually large crops, last summer, the canners put up an enormous amount of this healthful and delicious food, and therefore are selling at a great reduction, in order to reduce their large stock on hand. So the consumer is reaping the benefit. And the thrifty housewife will take advantage of the "special sales", to stock her supply-shelf with a goodly amount of stringless beans, rejoicing that she may thus practice economy and at the same time save herself time and trouble.

Besides cooking stringless beans in white sauce or butter, here is a delicious way of serving them "peasant fashion".

Simmer contents of a No. 2 size can of beans with one ham bone or a half-pound of bacon fat, for an hour. Season, and serve with vinegar. The bean's lack of fat is thus supplied.

High Food Value in Beets

BEETS are rated among the most highly nutritious of vegetables. The sugar percentage of the ordinary table beet is often as high as ten per cent. Therefore, this vegetable is a generous contributor of carbohydrates, which enter the tissues as glucose. From the oxidation of glucose in our tissues we derive more than half of our energy.

So the beet is considered one of the most important food-roots. Its vitamin content is considerable, although less than that of spinach, sauerkraut, turnips or carrots. Many palatable dishes may be quickly made from beets, as they may be purchased in ready-to-serve form and may be included in the diet in winter as well as summer. Canned beets are convenient for they have already been

thoroughly cooked. They may be quickly diced for salad, creamed in white sauce, or served with brown butter. Many people like the addition of hot vinegar.

Beets stuffed with peas are made from canned whole beets. The large variety should be selected, and the insides scooped out with a small spoon. Drain the liquor from a can of peas and heat them in a double boiler. Drain again, add a spoonful of melted butter, salt and pepper to taste, and fill the hollowed beets with them. The portion of the beets previously removed may be cut into small pieces and mixed with the peas if desired. The filled beets should be set in the oven for a few minutes. Pour melted butter over all and serve.

EX-CONVICT

Shot His Sweetheart and Three Policemen.

Owensboro, Ky., Feb. 26.—(UP.)—This portion of Daviess county was terrorized today while an ex-convict who last night shot and wounded his former sweetheart and shot down three of four policemen who tried to arrest him, remained at large.

Jim Milburn, the ex-convict, 30 years old, is believed to be demented. He was shot through the hand by one of the patrolmen when they cornered him in his home, but escaped after wounding the three officers. According to the story told by the former sweetheart, Mary King, she had refused to accept his attentions after his return from prison. Milburn shot Miss King through the shoulder after an argument on a down town street and then fled to his home.

Patrolman Charles Hays was the only one seriously injured.

SCANS 50 YEARS OF FIGHT FOR FORESTS

Tree Association Reviews Results of Activity.

Syracuse, N. Y.—The semi-centennial of forestry occurs this year. Charles L. Pack, president of the American Tree association, calls attention to this fact, and is celebrating the occasion by the publication of a book for free distribution, written in a popular vein, entitled "The Forestry Primer."

In 1876 a special agent was appointed by the Department of Agriculture to study forestry conditions in the United States. Since then the activities of private owners of forest land, the states and the nation have increased rapidly.

The necessity for the preservation of timber for ship building was one of the first influences that brought federal action. In 1799 congress appropriated \$200,000 for this purpose. In 1886, a division of forestry was created in the Department of Agriculture.

The forest service did not come into existence until 1905. Until that time, appropriations for forest conservation were small. The appropriations for the forest service in 1924 amounted to more than \$12,000,000.

In 1903 an intensive system for the protection of the forests against fire was established in New York state. Many steps in rapid succession followed on the part of states in the East, all looking toward forest protection, growing more forests and more careful use in logging and manufacturing of wood products.

Although the progress of forest conservation has been marked, the use and misuse of the forests has increased with greater rapidity. Records for 1924 show there were 29,000,000 acres of forest land burned over, and only about 35,000 acres planted with young trees. The disparity between construction and destruction is held to show the importance of the adoption of a complete plan for the conservation of this important resource.

Smaller Dollar Planned

The United States government has found printing paper dollars too expensive and the old silver dollar too cumbersome and heavy to be popular. For that reason a new metal dollar probably made of gold and silver much smaller and lighter in weight, is being considered.

MICKIE SAYS—

TIMES CHANGE • EDITORS WERE ONCE SO DOGGONE MODEST THAT THEY'D TRADE SUBSCRIPTIONS FOR PUMPKINS, CORD WOOD OR "WHAT HAVE YOU", AND THEN CRACK JOKES ABOUT THEIR PATCHED PANTS • THEN DAYS HAVE GONE FOREVER AND THE EDITOR PACKS AS MUCH OF A SWAGGER AS THE BANKER NOWADAYS

JOSIAH KIRBY

Jury Fixers Under Indictment—One Enters Plea of Guilty.

Cleveland, Feb. 27.—(UP.)—The Federal grand jury probing charges of jury tampering in connection with the trial of Josiah Kirby, returned two indictments today naming Ben Williamson, former Cleveland newspaperman.

The indictments charge Williamson induced James D. Donovan, former Mansfield politician, to approach two prospective jurors, Harry E. Smart, Gallion, and Gustav Baer, Mansfield.

The specific charge is that Williamson "secured and induced the approach of a prospective juror."

The indictment of Williamson followed on the heels of Donovan's plea of guilty. The plea was entered after Donovan made a complete statement to Donald Van Buren, Assistant Federal District Attorney and Postal Inspector A. P. Owen.

Very Sharp Indeed

Secretary Hoover was talking about a sharp business deal.

"It was perhaps a little too sharp," he said. "It reminds me of a girl who had just broken off her engagement."

"I suppose you'll give me back my ring?" her rejected sweetheart said to her.

"No," she answered firmly. "Diamonds have gone up. I'll give you back what you paid for it."

Bulgaria to Celebrate

The Bulgarian government is preparing to celebrate the one thousandth anniversary of the founding of the kingdom and the fiftieth anniversary of Bulgaria's liberation from Turkish rule. A series of brilliant festivities and historical exhibitions will be planned. Representatives of all foreign powers will be invited by the Bulgarian government.

POULTRY FARM FOR SALE.

GREECE RESTRICTS RADIO TO CITIZENS

Only Country Denying Privilege to Foreigners.

Washington.—Few countries place a ban on radio reception by foreigners; licenses are usually issued to all nationalities, except that four countries require reciprocal privileges for their nationals and one country permits only citizens to listen in. The ownership of broadcasting stations and permits to broadcast, however, are often reserved to citizens of each country.

According to recent advices from the bureau of the International Telegraph union at Bern, Argentina, Union of South Africa, Australia, Belgium, Canada, Denmark, Great Britain, Hungary, Ireland, Japan, Norway, New Zealand, Netherlands and Sweden follow the custom of the United States in permitting all to listen in; most of these countries, however, charge fees for the privileges.

Egypt and the Dutch East Indies have no broadcasting yet and consequently no regulations, while Germany, Italy, Switzerland and Czechoslovakia require reciprocity from the home governments of nations seeking receiving licenses.

Greece seems to be the only country reporting to Bern that does not permit foreigners to listen in under any circumstances, issuing such privileges only to Greek subjects.

Licenses to transmit in the United States are denied other than citizens, and this rule is followed in Germany, unless reciprocity is permitted, while New Zealand and Czechoslovakia deny the right to transmit to foreigners except in very special instances.

PUBLIC SALE

We, the undersigned, executors of the estate of Frances C. Pontius, will offer for sale at public auction on Saturday, March 6, 1926, at the late residence of Frances C. Pontius at the corner of Franklin and Washington streets in the city of Circleville, Ohio, the following goods and chattels belonging to said decedent consisting in part of large and small rugs and carpets, chairs, mirrors, pictures, cupboards, tables and table linens and wares, cooking utensils, heating and cook stoves, beds and bedding, dressers and numerous other articles.

At the same time and place at the close of the sale of the personal property we will offer the residence property located at the northeast corner of Franklin and Washington streets for sale at public auction. This property will be opened for inspection at any time up to the time of sale for any prospective buyer.

Call either of the executors or C. A. Leist, attorney for information as to terms of sale of said real estate.

BIG FOUR

Protests Granting Twenty-Four Bus Applications.

Columbus, Feb. 27.—The Big Four Railroad yesterday filed 24 protests with the utilities commission against applications of that number of bus and truck operators for certificates to operate.

Most of the bus and truck concerns against which complaint was filed propose to operate over irregular routes any place in the state. The railroad contends there is no public necessity for the additional bus service proposed.

His Name Perpetuated

The humorous slang phrase, "to Bant," meaning dieting with the purpose of losing weight, originated in the making of a verb from the name Banting. Banting was the advocate of such a system, which bears his name.

LOANS UP TO \$500.00.

Where the carrying charge is added to the cost of the thing you buy and the entire amount is payable in twelve monthly payments, you pay the interest in advance for one year. Now, if you settle in six months, half the interest is unearned and should be refunded. On the other hand, if you pay for six months and the article is then taken back because you miss a payment, you usually lose all you have paid and the unearned interest besides.

It is much better for you to borrow the money and buy for cash, by using City Loan service, you establish your credit for future use, buy what you want, protect yourself during sickness or unemployment and pay the carrying charge—not in advance, but just as you go, and at practically the same rate.

TIGER FLOWERS

First Negro To Be Awarded the Middleweight Championship.

New York, Feb. 27.—(UP.)—Tiger Flowers, who is a deacon of a Baptist church down in Georgia and who works at it, is the new middleweight fighting champion of the world.

The deacon out-cuffed and out-slapped Harry Greb enough in Tex Rickard's gardens last night to win the decision of two judges and to take the title away from the faded Pittsburgh wind-mill.

Flowers is the first negro to ever hold the middleweight championship and the first fighter of his color to win any title since Jack Johnson defeated Jim Jeffries for the heavyweight championship.

Flowers is 23 years of age and has been fighting for eight years. His record is not an impressive one, but it shows how hard he had to work to get up to the top. He has been through 120 fights and is credited with winning 90 of them.

There are no outstanding middleweight contenders in the class and the deacon may be around for some time.

TOLD IN JEST

Chop the Waves
"I am tired of the bounding main." "Why don't you have it bobbed?"—W. Va. Moonshine.

Mean Fling
Gerald—I shave every day. Geraldine—Do you shave the same people every day?

Not to Be Flattered
"Henry, you're getting to look so healthy." "I know, dear, but I want to stay home tonight."

FARMS ARE WANTED FOR CASH BUYERS.

We have a cash buyer for a good 60 or 70 acre farm in Pickaway county.

We also have a good 110 or 125 acre farm in Pickaway county.
CIRCLE REALTY CO.

THE HARTMAN REALTY CO.
We have several houses ranging from 8 to 11 rooms at reasonable prices in good locations.

We also have several farms for sale and trade for city property in Columbus, Lancaster, Logan, Athens and Chillicothe. We have several properties in Columbus, singles and doubles for sale or will trade them in on farms close to Circleville or Columbus.

WASHINGTON SPECIALS

Washington, Feb. 26.—(UP.)

The House appropriations committee today authorized an appropriation of \$350,000 to improve and modernize the site of the new Federal Industrial reformatory at Chillicothe, Ohio. The reformatory, now being established on the site of Camp Sherman, will be the world's most modern penal institution, Superintendent of Prisons Luther C. White told the committee. White only recently returned from an inspection tour of the reformatory.

Secretary of the Treasury Mellon announced today that persons with incomes exceeding \$5,000 will be given until May 15 to file their tax returns instead of March 15.

An appropriation bill carrying \$79,847,491 for the state, justice, commerce and labor departments for the next fiscal year was reported to the House today by the appropriations committee. The bill is \$2,253,403 in excess of current appropriations and \$59,480, less than budget estimates.

STATE DRY INSPECTOR PROBE

Columbus, Feb. 26.—(UP.)—Governor Vic Donahey this afternoon began recalling witnesses who testified before him recently in his personal investigation of law enforcement methods in use in the state prohibition department.

The witnesses were recalled in connection with charges that their testimony as previously given, had been "rehearsed" under the supervision of State Dry Inspector S. A. Propst, storm center in the investigation.

The first witness was State Dry Inspector W. D. Jones, a veteran of the dry department. He was questioned by the governor in the latter's private office. Utmost secrecy shrouded the proceedings.

Bodies and Minds

Many things have been said, and very well undoubtedly, on the subjection in which we should preserve our bodies to the government of our understanding; but enough has not been said upon the restraint which our bodily necessities ought to lay on the extravagant subtleties and eccentric ravings of our minds.—Edmund Burke.

**SCIENTISTS CHANGE
LEAD INTO MERCURY****Claim Success in Transmutation of Elements.**

New York.—The Scientific American publishes with its indorsement a report claiming the successful transmutation of elements.

Drs. A. Smits and A. Krassen of the University of Amsterdam have succeeded, the periodical says, in changing lead into mercury and thallium.

Emphasis is placed upon the minute care taken to obtain the purest form of lead, in order that no suggestion might be made of the presence of the transmuted metals as an alloy or impurity.

"The success of such experiments," says Orson D. Munn, editor of the Scientific American, "delights every physicist who is interested in the new science of atomic physics. Many scientists have been seeking to demonstrate that the only difference between the different elements lies in the number and arrangement of the electrons in their atoms. Transmutation is the best kind of evidence in support of the theory."

"There is no present intrinsic value in the achievement, but it opens up for the distant future possibilities we dare not even try to predict."

The Amsterdam experiments were made with a quartz mercury vapor lamp, similar to the one used by other scientists in their attempts to convert mercury into gold, the report says.

Two Series of Experiments.

Doctors Smits and Krassen describe two series of experiments—the first of which, owing to certain complications, were indecisive, "but the second series resulted in the transmutation of the element lead into mercury and thallium."

"Since in our experiments we were investigating the quartz transmutation into mercury," they added, "it was necessary from the first to avoid a mercury air pump and a mercury manometer. Therefore the lamp employed was evacuated by a carefully cleaned metallic pump with two tubes placed in liquid air, and finally by a large vessel filled with coconut carbon. It was also cooled in liquid air, a method by which a high vacuum could be obtained."

Details of Experiment.

The procedure by which mercury was obtained follows:

The quartz lamp was filled with lead; the lead then was heated in a high vacuum until it was red hot. The lead oxide coating being completely dissociated, the surface of the liquid lead became as brilliant as mercury.

The lamp was left to burn in vacuum. The lamp was also oscillated so as to make and break the current, thus increasing its intensity. After ten hours, the strongest characteristic lines of mercury and also thallium appeared on a spectrograph. Again and again the process was repeated and each time with the same success.

In later runs, along the whole lead spectrum, the mercury lines were dominant, Doctors Smith and Krassen declared, adding:

"The striking result just given seems to justify the expectation that if the lamp had a long enough duration of life, the point could be reached where the lead spectrum would have disappeared completely."

**Students Shave in Class,
Fighting Co-Eds' "Dolling"**

Berkeley, Cal.—The principle of equal rights for men has been established at the University of California. Prof. Ira B. Cross recently expressed annoyance at the time taken from studies by feminine students powdering their noses and freshening their countenances. He said boys had an equal privilege and rights if they desired them.

Two men appeared one day with shaving equipment and when Professor Cross started his lecture they lathered and shaved. Professor Cross led the applause, saying that if they would make their names known to him—he was unable to recognize them under the lather—he would see that they received a grade of "A" for the term.

A Sunday paper makes the best regulated living room like a theater after the audience has left.

**"HELIUM EXPRESS" TO
CARRY PRECIOUS GAS****Bureau of Mines Builds Car
to Transport It.**

Fort Worth, Texas.—The "Helium express" will be a picturesque part of war machinery, if plans of both army and navy for handling the buoyant element used in lighter-than-air craft develop according to present indications.

Discarding the tedious laboratory-like equipment now in use, the once rare gas will be rushed from base to base in long black trains of ominous-looking cylindrical tank cars, the first of which was approved recently by the bureau of explosives and is due to arrive at the United States helium plant here within thirty days.

Drawn up far enough behind the lines to be safe from hostile shells—for they will be charged to high-explosive pressure—a battery of nine or ten such cars will be able to fill a dirigible the size of the ill-starred Shenandoah.

One Car Sufficient for Blimp.

One will carry more than enough helium to inflate a blimp of the TC type, and in a fraction of the time required with the present "bottle" system of handling the gas.

Great as this step appears, it is really not as remarkable as the advance shown in the production and the handling of the gas during and since the World war. When it is recalled that, prior to 1918, less than the content of one "bottle" of 178 cubic feet capacity had been produced anywhere, the construction of tank cars capable of transporting 210,000 cubic feet each becomes less of a feat by comparison.

The history of helium development in this country is another commercial romance, tinged with the grimness of national necessity. From a business enterprise operated by two private companies, it grew to a national monopoly, the present plant having been built jointly by the army and navy, later operated by the navy alone, and now under jurisdiction of the bureau of mines, with every governmental department privileged to requisition helium for legitimate needs.

Cost of Production Cut.

The cost, once prohibitive, has come down from \$1,500 a cubic foot for the first draft produced to less than \$27 a thousand cubic feet for the \$50,000 feet a month extracted at the plant at this time.

Should items allowed for helium development in the present budget before congress prove sufficient to double the supply of natural gas, from which helium is extracted, the cost can be brought down to \$17 a thousand cubic feet, it is pointed out by E. A. Cattel, Washington, engineer of the bureau of mines in charge of helium development, who was here recently for a conference with plant officials.

Production on this basis would be at the rate of 2,000,000 cubic feet a month, or enough to fill a ship of the Shenandoah's size every four weeks. The cost of producing this amount, after the expense of laying a new pipe line had been charged off, would be little more than that of extracting the present output, said C. E. Cook, engineer in charge of production at Fort Worth.

The volume of natural gas handled would be much greater, however, for the helium content of that now available is only 1 per cent, varying a few hundredths from day to day, so that 1,000,000,000 feet of natural gas would be required monthly.

Some idea of the saving in handling and transportation costs may be gained from the fact that one of the new tank cars will replace 1,257 of the iron drums or "bottles" now in use.

**Japanese Lift Ban
on Kiss in Movies**

Tokyo.—Not so long ago the Japanese motion-picture censors permitted no picture to be shown in which there was a kissing episode.

The osculatory scenes were removed bodily because in this country kissing has always been considered extremely immoral. Of late months, however, the censors, influenced by the public, have become more liberal. Now the hero and heroine are permitted to clench in the western fashion and a brief kiss is allowable. But it must be brief, for if the scene becomes too ardent the censors will start using their scissors.

Home office figures show that the "love motive" in moving pictures is gaining in popularity among the Japanese fans. A report discloses that last year more of the "heart interest" pictures were imported into Japan than ever before.

More than 60 per cent of the moving pictures used in Japan are imported from Europe and America, the remaining 40 per cent being of domestic production. Japanese films have to do mostly with the historical drama, depicting brave deeds of the ancient Samurai—which may explain the 40 per cent.

Bar Wedding Gifts

Constantinople.—Wedding gifts have been abolished by the governor of Constantinople province. This is part of a program to encourage marriages and national economy.

Gobs Like Movies

Washington.—As contributing to the contentment of the navy's enlisted men movies are rated officially at 46.6 per cent, leading all other entertainments.

**The
AMERICAN
LEGION**

(Copy for This Department Supplied by the American Legion News Service.)

**SAMUEL TO ASSIST
ADJUTANT BARTON**

Frank E. Samuel of Topeka and Wichita, Kan., known nationally for his work as director of the organization and membership activities of the American Legion, was recently elevated to one of the most responsible positions in the Legion.

Under the recent consolidation plan affecting divisions of national headquarters, Mr. Samuel was named as assistant to National Adjutant James F. Barton and also director of general administration, while retaining direction of national organization and membership matters. The duties of national adjutant will be handled by Mr. Samuel in the absence or incapacity of Mr. Barton.

Mr. Samuel has one of the biggest jobs in the Legion on his hands, but his preparation for it has been long and thorough. He began his Legion work with the inception of the organization in 1919. His first experience in Legion administration was gained as assistant department adjutant of Kansas during July

Frank E. Samuel.

and August, 1919. After sixty days as assistant adjutant, so efficient was his work, the department heads saw fit to appoint him as department adjutant. Under his regime as adjutant, from September, 1919, to February, 1924, Kansas department became one of the strongest in the Legion.

When national headquarters learned of the good work Mr. Samuel was doing out in Kansas, he was drafted to head the organization and membership division for the national organization. He began that work on February 15, 1924.

Mr. Samuel served overseas during the World conflict as an enlisted man with the Three Hundred and Fifty Third (Kansas) Infantry. He was assigned to special duty with the regimental intelligence and operations section. He attended the officers' training school of infantry at Langres, France. "But," explains Mr. Samuel, "the armistice came along before the commissions were handed out and another good 'buck' private was saved for competent kitchen police duty."

Mr. Samuel was born at Downing, Mo., December 31, 1889. He was educated at Washburn and Fairmont colleges and holds an A. B. degree from the latter. He taught English from 1912 to 1916 in Canton Christian college, Canton, China.

**Philadelphia to Have
Americanism Congress**

Philadelphia will be the scene of a great national congress of Americanism next fall. If plans authorized by the national executive committee of the American Legion are carried out.

It was suggested that a congress of all organizations interested in Americanism activities would be an especially fitting observance of the one hundred and fiftieth anniversary of the adoption of the Declaration of Independence in Philadelphia on July 4, 1776.

Holding of the congress immediately before or during the national convention of the American Legion, which meets in Philadelphia, October 11 to 15, is the plan.

National officers of the Legion, the national Americanism commission and officials of Pennsylvania and Philadelphia will co-operate in developing the plans.

In Conference

Parson Brown—How am yo' hushan? Mandy? Mandy—He am done confin' to his room.

"Sho' 'nuff, now? Could Ah see him?" "Mebbe so. But he am in de jail house."—American Legion Weekly.

It Sounded That Way

"Did you show the bishop to his room, June?" asked the lady of the house.

"Yes, mum," answered the maid, "an' I left him prayin'. There was a chair got in his way before I could get the light on, mum."—American Legion Weekly.

x x x x x x x x
x **HARTMAN THEATER.** x x
x x x x x x x x

Ziegfeld's most perfect musical comedy, "Louie, the 14th," will be the attraction at the Hartman theater, Columbus, Ohio, commencing next Monday night, March 1. For nine months the famous comedian, Leon Errol, and a mighty cast of singers, dancers and comedians have been delighting New York in this glorified hit, and their appearance in Columbus will be one of the notable events of the season. "Louie, the 14th," was written by Arthur Wimperis and Sigmund Romberg, the most popular composer of lovely music in the world. Riotous comedy, marvelous scenic and spectacular effects, gorgeous settings and costumes are included in the wonders of "Louie, the 14th" as well as a complete pageant and the "Homeland male chorus. Supporting Mr. Errol is a brilliant group of principals. Doris Patston was brought here especially from England to create the role of the Peach girl heroine of "Louie, the 14th." Despite her youth she had already achieved fame as one of the stars of the London Revue, "The Punch Bowl." As Colette she is the toast of the officers and their men and the center of attraction in the magnificent banquet scene. Especially interesting also is the appearance of Ethel Shutta and Pauline Mason. Miss Shutta is a gifted dancer and riotous comedienne, while Miss Mason captivates with her speed compelling "Pep" number. Included also in the superb cast are Evelyn Law, highest kicker in the world; Edna Covey, ballerine comique; Florentine Cosnova, talented dancer; Simone de Bouvier and Catherine Calhoun Doucet; Glen Dale, the tenor Cosmo Bellew; Theodore Babcock, Alfred James. Then, too, are the Cosmopolitan Girls and the most beautiful chorus that Mr. Ziegfeld has ever assembled.

"Louie the 14th," is Ziegfeld's supreme achievement. It is better than "Sally" and funnier than "Kid Boots."—Matinees Wednesday and Saturday. Mail orders now.

WAYS TO PREVENT GARAGE ACCIDENTS

Caution Against Use of Cigarette and Other Flames.

In spite of the great number of accidents which have resulted from gasoline explosions, drivers and garage workers continue to do things which endanger not only their own lives, but also the lives and property of others.

It seems needless to caution against the use of matches, cigars, cigarettes and other open flames near gasoline, or near oil-soaked rags and clothing.

In drawing or pouring gasoline from one container to another, static electric sparks may be developed. It is advisable always to keep the two containers in contact with each other, or to attach a chain to the pouring container which will maintain the contact. This will lead off the electric charge and prevent sparking.

Sparks often result from striking together two pieces of metal. It is best to use kerosene instead of gasoline when cleaning oil and grease from metal parts.

Carry Fire Extinguisher.

Every motor vehicle should carry a tetrachloride fire extinguisher. For garage use probably the best fire extinguisher is one of the foam type. Never use water on a gasoline or oil fire. A mixture of sawdust and soda (about ten pounds of bicarbonate of soda to a bushel of sawdust) is good to put out oil fires. Sand is also used effectively.

The drip pan, side pans, and car in general should be kept clean and free from excessive oil. If present, excessive oil may do much to spread the flames in case of fire.

If extension cords are used for portable electric lights, it is necessary to guard against electric shock and fires resulting from electric causes. It is therefore advisable to use vapor-proof fittings, a keyless socket, lamp enclosed in a vapor-proof globe and further protected with a rigid cage to prevent breakage. It is also advisable to have armored cable instead of ordinary electric cord; this should be kept in good condition.

When it is necessary to jack up the car and get underneath, be sure the car is held up securely. Be especially careful if any of the wheels have been removed. Block the other wheels to keep them from moving. If the support should give away, the car may fall and crush you. It is best to use a pit if possible. Never depend on jacks when it is necessary to get under car. Horses are better supports than jacks, ordinary boxes or blocks. Remember, the brakes are not operative when the rear wheels are jacked up off the ground.

Avoid Carbon Monoxide.

When in the garage, the engine should not be run longer than necessary. Carbon monoxide is contained in the exhaust gases, and unless the garage is fairly well ventilated may cause headaches, other discomforts, and even death to the persons in the garage.

If you haven't a self-starter, be careful not to break your arm when cranking. Always pull the crank up, not down, and don't spin it unless absolutely necessary. When grasping crank, place thumb on same side of handle with the fingers; then if there is a kick-back, handle will slip from hand. Keep the spark retarded until the engine has started.

Be careful when working around or using rags near rotating fan.

Keep wrenches and other tools in good condition; if badly worn they should be discarded.

Enter and leave the garage slowly. Street car motormen, pedestrians, children, other drivers and garage workers may not be looking.

Don't drive too close to the gasoline pump at garage or filling stations and always be sure to shut off the engine when the tank is being filled with gasoline.

Cars in Canada

Canada has a registration of more than 633,000 motor vehicles. Ontario is the leading automobile owner among the provinces with 308,693 cars to its credit. The prairie provinces of Manitoba, Saskatchewan and Alberta, combined account for 166,234 automobiles. More than 60 per cent of the cars in that area are owned in rural districts.

MOTOR TRUCKS FINALLY INVADE BERMUDA

It is only recently that motor trucks have been permitted to be used on the island of Bermuda. Photograph shows a truck at work, building a road near the bay.

Song of the Flivver
By BLAINE C. BIGLER.
I go to haunts for which you yearn:
I make a sudden sally;
I rattle, shiver, twist and turn;
I bicker down the valley.

I run, I glide, I bump, I jump;
I miss, backfire and quiver;
I overheat and skid and pump;
I shake your heart and liver.

I rattle underneath the stars;
I rumble on the bridges;
I squeak at many little jars;
I grind o'er sundry ridges.

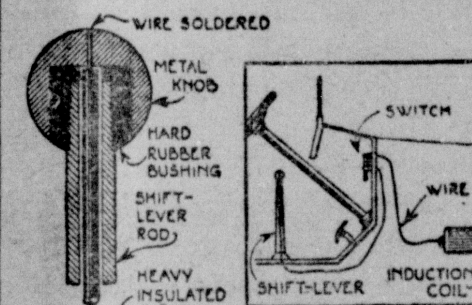

I tremble when I go to stop;
I tremble when I'm running;
I tremble till I lose my top
And then you get a sunning.

I am the flivver, don't you know?
My way's not smooth—no never.
But cars may come and cars may go
Yet I go 'on' forever.—Farm Life.

Device for Discouraging Unauthorized Joy Riding

While many methods have been devised to prevent unauthorized joy riding, one recently installed by an electrician is especially novel.

It was done by making a special handle for the gear-shift lever with an insulating gap between the ball-shaped handle and the rod. A lead from the secondary terminal of the induction coil is brought to this ball handle through the center of the shift lever.

Device for Shocking Joy Riders.

With the engine running, any effort to shift the gears causes the full intensity of the high-voltage current to pass through the driver as his foot is on the clutch pedal completing the circuit.

The current is not injurious, but is so startling that it will unnerve and weaken the most daring thief. A cut-out switch at the edge of the coil is carefully thrown out before the owner starts to drive.—Popular Science Monthly.

Timely Tips Will Help the Careful Car Driver

Tire chains are an almost indispensable motoring accessory in wet weather, but many a car owner has ruined his tires because he did not give the chains proper consideration.

First of all, chains should be of the proper size; not so tight as to eat into the tire's tread and side-walls nor so loose as to slip under strain. They should be adjusted to creep slightly so as to distribute the wear over the tire.

Put on chains when they are needed—no sooner and no later. And take them off as soon as the need is past. Keep them on the tires as long as they add to driving safety but not a moment longer. This advice is particularly applicable to paved highways.

Apply brakes even more cautiously when chains are being used. A sudden application of the brakes locks the wheels and often causes the chains to eat into the rubber.

To Prevent Sticking of Tires After Vulcanizing

The sticking of tires to the mold after vulcanization has always been a great source of annoyance to all repairmen. The best applications heretofore used as possible preventatives have been lacking in some respects. Therefore the discovery by a repairman of Perth Amboy, N. J., of the use of a material which overcomes this trouble will be welcomed by vulcanizers everywhere. Since the discovery is so simple, the wonder is that no one has reported it before.

So simple a substance as cocoa butter solves the problem. The method followed is this:

Clean the mold thoroughly with fine emery paper. Then after allowing it to warm up a little, go over it with a piece of cheesecloth saturated with cocoa butter. Next wipe till glossy and apply soapstone.

This method of preparing the mold has been tried in the Goodyear repair school and found to work perfectly.

AMUSEMENTS

The Paramount picture, "Wild, Wild Susan," at the Met theater is a New York story of a peppy society girl whose craving for adventure makes her the bane of her parents' existence and almost is the undoing of the city's police and fire departments.

Bebe Daniels is starred in the title role, with Rod La Rocque, as Tod Waterbury, a kindred wild, wild spirit, featured in support. From the time that Bebe complicates a traffic jam in lower Fifth avenue until as a girl sleuth, she bags a gang of "desperate bond thieves" in a haunted house, you discover that she is truly Wild Susan. Fire trucks dash out of a side street and she leads the procession at top speed thru the traffic for block after block, with cops, firemen and bystanders scared stiff.

Bebe's father tries to shift her off onto a friend by sending her abroad with him on a European tour. But one look at the insipid fellow who is to be her sailing companion brings Bebe back to earth again on the hop. She had accepted the trip with great pleasure, dreaming of the fine prospects of continuing her wild career on the other side, but just a side-glance at Eustace Waterbury and she drew the line. Eustace's older brother Tod (LaRocque) is struck by her pep and "go" as she leaps from boat to dock as the gangplank is being drawn in and follows her home in his cab. Tod had refused the trip abroad so as to continue his career as taxi driver to gather material for a novel.

Arriving home, Bebe voices her opinion of the entire Waterbury clan. Tod arrives and Bebe, never having met him, refuses to see him. When her father starts to lay down the law, she stalks out in a huff, grumbling something about going out where she can do as she chooses. She does just this when she obtains a job as a woman detective with a local agency. La Rocque is close at her heels no matter where her work leads her, introducing himself as Jay Elton Thompson, the name he uses on his books. He offers the chief of the detective agency \$1,000 if he can locate his missing "chum," Tod Waterbury and manages to get Bebe assigned to the case. From the outset the laughs come thick and fast, but at this point they start to pile up, on one another.

The final scenes at the haunted house are a riot. As events develop the whole thing is proved a frame-up engineered by Bebe's father and the detective chief to cure the girl of longing for adventure.

"Miss Bluebeard" and "The Manipure Girl" combined don't begin to come up to "Wild, Wild Susan." It has more than a generous amount of speed, romance, pep, thrills and fast moving entertainment.

Tom Geraghty wrote the screen play from the Liberty magazine story, "The Wild, Wild Child" by Stuart Emery. A few of the big names in

the cast include Ivan Simpson, Henry Stephenson, Osgood Perkins and Russell Medcroft.

BRIEFLY TOLD

FINAL ARRANGEMENTS MADE

For House Warming Party On April 9th.

An informal meeting of members of the committees of the American Legion and Auxiliary was held at the home of Mrs. A. A. Parrett last evening and final arrangements for the housewarming party which they have planned for Friday evening, the 9th of April, were made. Committees were chosen, and other matters of importance given attention. The names of the committees will not be announced until after the next meeting of these units.

This is planned to be one of the biggest parties that has ever been held here for the purpose of raising money for the relief of the ex-service men and their families. As everyone knows the work of these organizations is directly to benefit those deserving World War veterans who have not been remembered by their Government and also to aid the Government in the matter of those already being cared for in the different hospitals which comprise the Central district.

The relief work of these organizations has gone forward steadily since their inauguration back in 1921 but outside of these who do the work, and possibly a few interested friends this work is not generally known. Only this week the auxiliary sent some clothes to Hospital No. 97 in Chillicothe. A number of canary birds were also taken to this hospital at this time as those poor unfortunate boys who are confined there are very fond of them and while giving them the care that they need are diverting their minds from their own cares and sorrows. These birds were sent through the courtesy of Mrs. A. W. Holman.

Canary birds seem to be a poor gift to send to a hospital where only men are patients but a trip to this place which only a few short years ago was a weekly and for some a daily trip, would reveal just how much appreciated this small gift would be. To be sure there are other things necessary too, and these are being sent monthly, without much display. If the work of these organizations were known and broadcast as they should be it would not be necessary to solicit members to either of them as every one who is eligible would want to be a member. A chance visitor at one of the hospitals on Christmas would very easily recognize the necessity of these organizations.

Nothing we can do for the men confined in the hospitals through disability from service is good enough for them. They have sacrificed their all for our comfort and in return many are paid with neglect, and it is to these that the Legion and Auxiliary are devoted.

When a member of the Legion or Auxiliary asks you to buy a ticket for their party on next April 9 try to recall what you feel when these truths are presented to you.

FALL VICTIM'S WIDOW TO GET COMPENSATION

Mrs. Joseph Curtis Granted Allowance For Support of Herself and Two Children.

Columbus, Feb. 27.—Mrs. Iona V. Curtis, widow of Joseph M. Curtis, who was killed Jan. 21 in a fall at the Ralston Steel Car Co., yesterday was granted a weekly workmen's compensation of two-thirds of his average weekly salary, \$19.35, for 416 weeks by the department of industrial relations.

MACK PARRETT

Finds College Students Require More Thorough Health Supervision For Correction Of Injurious Habits

More thorough health supervision of college student bodies is advocated by Frederick L. Hoffman, LL. D., following a study of student health activities.

"In no direction has the modern health promoting movement made greater progress than in the health supervision of college students at certain higher institutions of learning," admits Dr. Hoffman, consulting statistician of the Prudential Insurance Company. "While this is as it should be, it is nevertheless, regrettable that so many institutions consider the subject in a superficial manner."

He points to the health work of the University of California and the University of Illinois as notable exceptions and, in treating the subject in "The Spectator," explains the reasons for the present situation.

at the latter university gives some interesting revelations, especially in the decreasing amount of sleep being obtained by women students. During 1923, 3,211 students were examined, of whom 2,208 were men and 1,003 were women.

"Sleep of less than seven hours was relatively much more common among women than among men, indicative of health injurious habits which it should be the function of a university to control to better purpose," holds Dr. Hoffman in his analysis of the report.

"With reference to sleep, it is further said that during the last three years the medical histories of the women have shown an increase in the number of those getting on the average less than seven hours sleep," Dr. Hoffman says. "It is properly pointed out but

this evidence of insufficient rest is not without significance in adolescence when the stress upon the body, particularly upon the nervous system, is heavy."

The report also showed, according to Dr. Hoffman, that the wearing of glasses is becoming more common and is "evidence of the effect of close use of the eyes in modern life suggesting the education of the pupils to the necessity of correcting eye strain."

"Of exceptional interest also is the statement that of the men students examined for the classes 1923-1927, 4.4 per cent gave evidence of spinal curvature, while the corresponding figure for women was 22.6 per cent," Dr. Hoffman stated.

TO TRADE JEWELS FOR FARM TOOLS

Soviet Russia Ready to Barter Treasure for Agricultural Machinery.

Moscow.—Soviet Russia is ready to turn the crown jewels of the czars, which were seized in the revolution, into American plows, tractors, and machinery. Negotiations are in progress for the sale of the vast collection of gems to American and other foreign jewelers, but it is realized that private buyers can take only a negligible portion of the treasures because of the enormous value. The government, therefore, is prepared to exchange the remainder for American agricultural machinery, locomotives, and other products Russia urgently needs.

"We want to turn the glitter of our 25,000 diamonds into the glitter of American steel," said one high official. "These magnificent jewels were bought by Russia's former tyrants with the sweat, toil, and trial of our peasants; we desire now to give them back to the peasants in the form of implements with which to till the ground, or machinery for industries. We have already turned millions of military bayonets into plow shares; we wish now to turn the imperial jewels, which are a dead asset, into tractors."

Inventory of Jewels.

The jewels date from Peter the Great to Nicholas II. They comprise 406 separate pieces of jewelry. The total weight of the diamonds alone is 25,300 carats; pearls, 6,300; sapphires, 4,300; emeralds, 3,200; and uncut rubies, 1,300.

No other historical collection of gems, whether royal or private according to the Russian officials, approaches the crown jewels, either in value or historical interest. The present collection does not represent all the Russian crown jewels, but only those covering the last 200 years.

The jewels offered for sale are appraised variously by Russian, French and Czechoslovak gem experts, but the average of their estimates is \$244,000,000, about \$50,000,000 greater than Russia's debt to the United States.

Last Rulers Moderate.

Of the 406 items in the collection, 29 per cent were supplied by Peter the Great, 40 per cent by Elizabeth, Catherine the Great, and Paul; 25 per cent by Alexander I and Nicholas; 10 per cent by Alexander II and Alexander III, and 5 per cent by Nicholas II.

So, contrary to general belief, the last czar and czarina were relatively moderate in their expenditures for crown jewels. During the last years of her life the empress was so absorbed in mysticism that she regarded the wearing of jewels as unlucky.

Conspicuous among the collection are three noble crowns. The largest of these, the "imperial crown of all the Russias," was made for the coronation of Catherine the Great in 1762. It contains 4,956 diamonds, 75 huge pearls, and many other large stones. Surmounting the crown is a superb cross of diamonds supported by an uncut ruby of 402 carats, one of the world's largest. The crown is valued at \$2,000,000.

Other principal articles are nine emblematic globes, scepters, and chains of fine craftsmanship, containing diamonds, pearls, and rubies weighing as much as 50 carats each; 23 magnificent crosses, many stars, 16 gorgeous necklaces of diamonds and pearls, 36 brooches, 10 tiaras, 9 diamond-studded lockets, 29 pairs of earrings, including one set of gigantic emeralds of 174 carats each.

Research Experts Find

Radio Noise Remover

Philadelphia.—Another step forward in eliminating unwanted noise in radio receiving sets is reported by research workers in the University of Pennsylvania.

Dr. Harold Pender, dean of the Moore School of Electrical Engineering, said that in collaboration with Dr. J. H. Muller, assistant professor of chemistry, he had perfected a new noninductive, high-resistance filament to take the place of impregnated paper used widely in a grid leak.

These filaments are mounted in glass tubes. A coating of metal a thousandth of an inch thick upon a glass core gives a grid leak of uniform resistance which does not vary with weather conditions, whereas the impregnated grid leak varies as much as 100 per cent, throwing the receiving set out of perfect adjustment.

A well-adjusted grid leak prevents the tubes from "spilling over" draining off the static charge gradually and without noise.

Feeding Snakes Odd

Job Held by Woman

Minneapolis, Minn.—Feeding 13 Texas diamond rattlesnakes by forcing mice down their throats and bathing the reptiles with soap and water twice a week are the duties of Miss Grace Olive Wiley, curator of the museum of the Minnesota Academy of Natural Science here.

Miss Wiley says rattlesnakes vary greatly in their temperaments, some being more sensitive and nervous than others, reacting in a different manner to the same treatment. She says the reptiles have an affectionate instinct, as all like to be stroked and petted, some showing their fondness for this attention by arching their backs like cats.

Healthy and Handy

Sauerkraut has been found rich in those "growth substances" known as vitamins, necessary to preserve and promote health. It is said to be a valuable source of iron and vegetable salts and to resemble buttermilk in its tendency to prevent the growth of harmful bacteria in the intestines. Recent scientific tests, it is claimed, have proved that sauerkraut may be preserved perfectly in the can.

No Painting From Life

More than 80 portraits of Columbus are known, but none of them was painted from life or even during the lifetime of the discoverer.

Smart New Modes Introduced for Spring Wear

MME. SCHUMANN-HEINK

Returned Opera Singer Enthusiastically Received.

New York, Feb. 26.—(UP).—During all the years since 1898, when she made her debut it is doubtful if Mme. Ernestine Schumann-Heink ever received a greater ovation than that accorded her in "Das Rheingold," the vehicle for her return to the Metropolitan Opera House.

The 64-year-old singer was "among friends." The house was crowded to capacity and after she had lifted her still melodious contralto voice the audience remained to applaud and applaud.

Schumann-Heink sang a short role. She was on the stage only ten minutes. When the curtain folded many of the usually phlegmatic Wagnerian audience rushed down the aisles to the orchestra pit and cheered wildly.

But the veteran singer didn't want to take her bows alone. First she had the entire company stand with her. Then for a half dozen bows, she clutched tightly the hand of the ponderous tenor, Lubenthal, and refused to occupy the spotlight by herself, until the audience by repeated applause had forced her compliance.

All Kinds of Relics in "Courting" Couch

Ottawa, Can.—An old sofa which had been the courting place for seven daughters in the family yielded all kinds of relics when it was torn apart recently. The sofa belonged to George Blake of this city.

Blake, taking it apart for repairing, found 47 hairpins, 3 mustache combs, 46 buttons, 18 needles, 8 cigarettes, 5 photographs, 217 pins, some grains of coffee, 6 pocket knives, 15 poker chips, a bottle of headache tablets, 34 lumps of chewing gum, 9 toothpicks and 4 buttonhooks.

Paris Press Pokes Fun at American Women

Paris.—American women are the subject of many sarcastic comments in the French press. Here are two from daily papers:

"An American woman enters a grocery and orders a well known pick-me-up of high alcoholic strength. 'Yes, madame, a bottle?' 'No, twenty-five bottles!' 'Ah, then, it is for a bar?' 'Oh, no! For myself. I am going away for twenty-five days this month.'"

The scene of the second was a cabaret in which was a matinee idol with some woman friends, when an American woman thrust a 500-franc bill at the young actor because he refused to dance with her. This annoyed the girls with him, the story goes, and it was not merely the bill that was thrown into the undiscerning American's face.

First U. S. Treasurer

Michael Hillegas, a well-known merchant of Philadelphia, was in 1775 appointed by the Continental congress, treasurer of the United States. He held this office until 1789, when Alexander Hamilton was selected by President George Washington first secretary of the treasury. Hillegas was the son of another Michael Hillegas, who came to America from Germany.

Thursday night, has been kidnapped.
Since the girl's disappearance, a
man has called the Zagst residence. He
said "Catherine is ill." Police are at-
tempting to trace the call.

Speaking of exasperating things,
how about trying to smoke a busted
cigar?

New Novelties in Fabric and Color

Old Favorites Also Coming
Into Prominence With
Late Fashions.

The variants and original treatment
of certain established fashions is of
unending interest, observes a fashion
writer in the New York Times. The
flare is presented in countless ways,
creating in most of its illustrations the
uneven hem line, which in a bias cut
of fabric is in any event inevitable.
The tube dress is elaborated by the
addition of flounces, plaited girdles,
panels and inserted plaits. The
straight skirt is no longer necessarily
plain, but is laid in a finely plaited
kilt. The circular flounce need not be
attached in a straight line to "cut"
the figure at an awkward point, but
may form deep graceful points on the
hips, as shown by some of the promi-
nent couturiers of Paris in their
latest models. All efforts to discard
or to "pinch" the unfitted blouse
bodice having been successfully re-
sisted, it is given variation with fine
plaiting, with motifs and borders of
needlework or passementerie, and in
some models is slashed in front to
show a vest or gilet underneath. The
detail of neck trimming has become a

Printed Silk, With Bolero, Circular,
Extending Below Waistline.

prominent feature. The entire collec-
tion of the season's costumes presents
an unprecedented number of models
from which to make individual selec-
tion.

The Return of Taffeta.

The latest news from Paris estab-
lishes the vogue of several novelties
in both material and color. Old
favorites, too, are coming back strong,
their charm already illustrated in the
models seen at the fashionable south-
ern resorts. One notices the return of
taffeta, the crisp but supple kind with
rich luster. There has been such a
craze for the soft fabrics, satins,
crepes and voiles, and for the sheer
stuffs, such as cloud-like chiffons, that
taffeta has been seen in only a few
eccentric creations. But some of the
leading artists in Paris have persisted
in their endorsement of it. Lanvin's
favorite period model is most happily
done in taffeta. The wide skirts and
bouffant effects of the Lanvin gowns
have become established as a style
without age or season, with a dignity
and distinction reminiscent of court
dress of an earlier day. Nothing in
materials is more suitable than taffeta
for this style of gown.

The different varieties of taffeta in
weave and color are interesting. Both
manufacturers and modistes are han-
dling it with enthusiasm. In plain
colors there are blue, blue from navy
to Brittany and perverche, brown in
several lovely shades, beige and
above all, gray. Soft, rich tones and
pale shades have ousted more weird
colors. The old-fashioned shepherd's
plaid is much used in tailored and
semi-tailored frocks. It is always chic,
also the stripes in colors and "greige."
Some delightful dance frocks are ar-
riving from Paris, made of the newest
taffetas, in wrap printed and flower
patterns. Chiffon taffeta is the most
suitable for evening gowns and linings
for elaborate wraps. For sports suits,
tussah, surrah and silk alpaca are
much liked.

Sheer Fabrics.

Sheer fabrics, the filmy, delicate
chiffons, the crepes and other silky
weaves of nets and tulle, remain
fashionable, and form the larger part
of a smart wardrobe. These are shown
in plain colors and in many patterns
established by both foreign and domes-
tic designers. In these, too, are many
interesting revivals. One that appears
to have an enduring charm, especially
for women of refined taste, is the small
polka dot, of which the oldest and
one of the most prominent houses in
this country makes a feature. This
prim little design is shown in both the
crisp silks and the crepes, in white
on color and color on white, and in
many pleasant combinations of shades.
Small checks, also, are much liked by
some of the couturiers, who use them
in the chic jumper, the tailleur and
other models of informal dress. In
some of these costumes a coat, and

even a hat of the small tailored style
with draped crown, are made of the
same material.

Interesting things are being done in
combination of materials and colors.
Plain crepe is used with figured crepe,
or two shades of chiffon are harmoni-
ously arranged. In some of the latest
models sharply contrasting fabrics are
put together. In a late Paris model,
net is alternated with taffeta in wide
bands to form a full skirt. Satin and
chiffon are combined in a delightful
afternoon gown in browns and gold.
The chiffon is finely plaited, in panel
godets, scarf and undersleeves. Charm-
ing results are shown in taffeta com-
bined or garnished with lace. In
picturesque dinner costume, Quaker-
gray taffeta is used in pannier effect
over a skirt flounced in pale yellow
lace, with touches of soft rose in knots
of velvet ribbon. In another gown of
this description misty blue, a new
shade in taffeta, is combined with silk
lace on which the pattern is lightly
traced with silver thread. The last
word in this fancy for contrasts is a
frook of black taffeta trimmed with
bands and deep cuffs on the long
sleeves of imitation leopard skin
marked in yellow, brown and black.

In Wool and Cotton.

Among the advance styles of spring
are many new models in wool and
some in cotton, the latter being for
morning wear. Suede cloth for a coat
frook is new and luxurious. It is
striking in soft brown with trimming
of gilt leather. Velours and velveteen
are still seen in the more elaborate
costumes for wedding gowns and for
dress occasions. A wedding dress
lately designed in Paris for an Ameri-
can girl was made of white velvet em-
brodered in pearls and brilliants, with
a train of superb rose point lace fin-
ished with a band of velvet. Another
stunning wedding costume, from
Worth, is in the conventional satin
with flounces of point d'Alencon lace,
orange blossoms and pearl embroidery.

The vogue of gray extends to every
sort of costume. Some ensembles are
built throughout of one shade of gray,
trimmed with fur, and include the hat,
shoes and gloves. A fantastic whim is
expressed in an outfit of light beige
marquise for frock and cape, with a
turban of draped crepe and stock-
ings of bright red and colonial pumps
of black patent leather on which are
large buckles of black patent and red
kid. A geranium-colored one-piece
frook and coat of crepe Elizabeth is
bound about the pockets, collar, cuffs
and belted with bright gilt leather. A
separate coat of beige kasha to be
worn with a dress of the same shade
is also bound with gilded kid skin. One
other especially showy model is a rag-
lan of vivid green kasha lined with
white taffeta. The rather wide sleeves
are embroidered from shoulder to
wrist in white zephyr and the high
collar is of clipped white wool.

Styles in Sleeves.

Definite changes have been taking
place in sleeves during the past two
seasons. Apparently no compromise is
admitted. A sleeve is long or else

Unusual Arrangements of Plaits Used
on Skirt of Cape Frook.

nonexistent. Many different styles of
sleeve have been introduced lately.
There was the "bishop" sleeves, the
modern version of the leg-o-mutton of
long ago, the sleeve that was orna-
mented on the upper half and plain
below, the flaring, bell-shaped and
wide-cuffed sleeve. For evening and
afternoon, several variants of the
graceful sleeve were seen. But
gradually many of these models were
eliminated. A few of the latest sleeves
are new in treatment, both smart and
becoming.

Premet makes exceedingly long
sleeves that almost conceal the hands.
In one ultra-smart frook of sea green
crepe, the long sleeve clings to the
arm with a mousquetaire effect over
the hand. The coat to be worn over
this frook is of black kasha lined with
green and has straight sleeves that
widen in bell shape from the elbow
downward with a narrow soft turn
back cuff of the lining.

Pearls for Little Girls

Pearls for little girls come in sets
consisting of bracelet and necklace.
Simplicity is the keynote. Pearls of
even size in the various new tints
comprise these sets.

WILLIAM A. SMITH DEAD.

William A. Smith, 56, retired farm-
er, whose home was five miles south-
east of Groveport, died Saturday at
White Cross hospital, Columbus.

The funeral will be held at 2 o'clock
Tuesday at the residence. He is sur-
vived by his widow, Mrs. Mary Smith;
a daughter, Mrs. W. S. Badger; a son
Forrest Smith, Pickaway county; a
brother, Joseph Smith, Lithopolis;
three sisters, Mrs. John Dum, Grove-
port; Mrs. Sarah Coover, Degraff, and
Mrs. Stella Book, Sylvia, Kansas, and
five grandchildren. The body will be
placed in the mausoleum at Lithopolis
cemetery.

Columbus today.

W. H. Ours was a business visitor in
Columbus today.

Walters Valentine was a business
visitor in Columbus today.

George P. Kaye of Chillicothe visited
friends in this city, Sunday.

Rev. A. H. Beardsley attended a
ministerial meeting held at the Y. M.
C. A. in Columbus today.

Mr. and Mrs. L. O. Wheat, of Co-
lumbus, were Sunday guests of Mr.
and Mrs. Edward Rinehart at Wil-
liamsport.

Cyril Palm went to Pittsburgh,
Pennsylvania, where he has accepted a
position on the road for the Quaker
Oats company.

Clark Anderson, who is representing
the Pickaway Dairy company at
Welch, West Virginia, spent Sunday
with relatives in this city.

David F. Niles has returned home
from Venice, Florida, where he spent
the winter with S. D. Riegel. The lat-
ter will not return until April.

Mrs. I. U. Finkel has returned home
from Columbus where she was the
guest of her granddaughter, Mrs. F.
A. Mossgrrove, at 2572 Bryden road,
Bexley.

ANNUAL INSPECTION.

The Pythian Sisters will hold their
annual inspection Thursday evening,
at 7:30 o'clock. Mrs. Ida Gillespie, of
Washington C. H., will be the inspect-
ing officer.

WHAT IS TO BE DONE?

"A very difficult question," the Presi-
dent calls the traffic casualties of the
time. The figures that he cites—24,000
persons killed in a year upon the
streets and highways of the country,
and probably more than 500,000 in-
jured. This means that over a period
of the same length as our participa-
tion in the world war Americans are
losing three-fourths as many lives on
streets and roads as they lost to Ger-
man bullets, and running up in addi-
tion a non-fatal casualty list thrice as
great as they did abroad.

"The president has asked all the
governors to appoint delegates to a
national safety convention to assemble
in March. While we know of no for-
mula to meet the situation he has out-
lined the conference may write history
by focusing public attention on the na-
tional aspects of a problem made up
of a multitude of incidents at street
corners and cross roads. Many com-
munities are at work seeking and ap-
plying remedies.

The figures set forth in this article
certainly ought to be a very convinc-
ing argument for

TEN MILLION DOLLARS WILL BE SPENT

TO BUILD A SIXTY-NINE MILE STRETCH OF DOUBLE TRACK

By the Chesapeake & Ohio Railroad Company From Scioto to Valley Crossing to Connect With the Hocking Valley Railroad—The Company's Tracking Agreement With the Norfolk & Western Railroad Expires In 1927.

Eventual completion of the Nickel Plate merger, now pending before the interstate commerce commission at Washington, will result in added importance attaching to Columbus and central Ohio as a railway center.

Columbus will become an important gateway for the unified system, as soon as the 63 miles of new double tracked roadway from Gregg to Valley Crossing is completed. It will connect the Chesapeake and Ohio with the Hocking Valley.

All of this, of course, is contingent upon the proposal being approved by the commission.

This new line of road will permit movement of tonnage in considerable volume thru Columbus to the Marion gateway, thence over the line of the Erie constituent west to Chicago. The diversion will relieve part of the congestion at Cincinnati where the peculiar topography makes freight operation a perplexing problem.

The Cincinnati business section, situated in a deep valley, is reached by the railroads which enter thru many narrow windings among the hills. It is the only point, outside of Florida, where a serious car shortage occurred during 1925. A daily average shortage of 1172 cars was reported in September, due partly to the increased demand for West Virginia and Kentucky coal, which overtaxes the capacity of the Cincinnati gateway.

With the completion of the 63 mile roadway, Columbus will become a gateway for the north and south traffic to be developed by the Van Swearingen system from Michigan points and Toledo, thru Fostoria, to Elkhorn City, Kentucky, on the Chesapeake and Ohio. Railroad operating men profess to see great possibilities in this route, which is substantially shorter than the route now being used for traffic between Michigan points and Toledo and the south, Van Swearingen officials said.

Over the line thru Columbus will also move tonnage destined for Hampton Roads, which is another point on the system designed for marked development.

The purpose is to make Hampton Roads a larger receiving point for imports, as well as commodities for export overseas. There are also possibilities from the standpoint of grain, moving from Toledo, as well as Michigan products, which can be shipped to Hampton Roads for export.

At present the movement of Chesapeake and Ohio tonnage to the Hocking The Chesapeake and Ohio has only limited trackage rights over this line, the Norfolk and Western movement being so heavy that, to protect its own traffic, it does not obligate itself to take more than 600 loads per day from the Chesapeake and Ohio.

Discretion as to the amount of volume accommodated rests with the Norfolk and Western, which has been liberal in its treatment. The Norfolk & Western management has in the past, urged the Chesapeake and Ohio to provide its own line for handling its traffic, particularly in view of the fact that the present trackage agreement between Waverly and Valley Crossing expires in 1927 and cannot be renewed because of the Norfolk & Western's imperative need for the larger use of its own line because of traffic increase.

The proposed 63 miles of new road will have a maximum and limit-

ing grades of 0.5 per cent against southbound movements, which now consist largely of empties, and a maximum and limiting grade of 0.2 per cent northbound, as against the northbound grade of 0.33 per cent over the Norfolk and Western's line. This better grade will enable movement of bituminous in trains of about 8250 gross tons, or about 100 cars each. The movement between terminals will be materially expedited. Motive power requirements will be lower and a more efficient use of freight equipment will result.

The new line is imperative for two reasons, principally. First, it will bridge the only gap in the otherwise continuous operations of the unified system, and, secondly, it will place the road in a position to meet progressively the anticipated increases in coal movement to points north of the Ohio river and to the northwest.

Since 1923, the westbound coal traffic of the Chesapeake and Ohio has increased enormously—136.7 per cent in 1925. Of the Chesapeake and Ohio's coal tonnage about 70 per cent moves to connecting lines. Of this tonnage to connections, all but about 10 per cent moves in approximately equal volume, by way Cincinnati, and Columbus, to the Great Lakes, the large industrial centers of Michigan, Indiana, northern Ohio and central freight association territory generally, and in small but increasing volume to the northwest.

The capacity of both the Columbus and Cincinnati gateways was reached in 1924. It has been estimated that in the next five to 10 years the movement will reach 4000 cars daily or 60,000,000 tons a year. At least 40,000,000 tons, it is estimated, will move westward—25,000,000 by way of Columbus and 15,000,000 tons by way of Cincinnati. Facilities are, therefore, required for the handling thru the Columbus gateway of an estimated 25,000,000 tons a year.

The new line will shorten the movement between Russell, Kentucky, and Toledo by about 106 miles, as compared with the route thru Cincinnati over the Chesapeake and Ohio constituent and its connections. The estimated cost of construction of the new line is \$10,000,000.

AIDS STOCK RAISER

Doctor Bunyea's work is contributing largely to the protection of one of America's largest industries through developing ways and means to prevent or cure various diseases, including rabies, foot-and-mouth disease, hog cholera, fowl pest, bird pox.

TRUE FABLE CITY.

Denver, celebrating its semi-centennial anniversary of Colorado's admittance to statehood, is known as the Aladdin City, being the youngest community of 300,000 people in the United States.

It's Zero in Popularity Over Here. Income tax publicity likely to be just as popular in France as it has been in the United States—Boston Globe.

Ending of Coal Strike Celebrated by the Miners

Miners in a Pennsylvania town celebrating the settlement of the long anthracite coal strike. This is portrait of Richard F. Grant of Philadelphia, president of the Susquehanna Cellulose company, who is credited by both sides with having brought the strike to an end.

HAPPENINGS IN OUR STATE

Taken Direct From Wires By Correspondents of the United States Press Association.

(United Press)

Columbus—The public utilities commission today overruled the petition of the Logan Gas company for a rehearing of the commission's action in striking from the files of the company's second schedule of increased rates.

The company filed the motion a week ago. The commission ruled the new schedule could not be accepted because the company has filed a previous rate schedule which has neither been approved or rejected by the commission. The company was expected to appeal to the supreme court.

Columbus—Radio station WAIU tonight will fire the opening gun of the 1926 enrollment campaign for the Citizens Military Training camps, when Lieutenant Francis W. Glover, Fort Hayes, will tell how young men of 17 to 24 years may take advantage of the camps.

Citizens Military Training camps are to be held this year at both Camp Knox, Kentucky and Fort Benjamin Harrison, Indiana. A third camp will be established for the first time at Fort Thomas, Kentucky. The camps will be operated from July to August.

Columbus—Agricultural production in Ohio is normal, it was rated by State Director of Agriculture Truax today, as regards the major crops. Prospects for Buckeye fruit are above the average, although definite statistics are not yet available.

Columbus—John S. Schneider, 65, nationally known photographer, who was born in Galion, died yesterday at his residence here. Schneider was vice president of the Baker Art gallery and had been a photographer since 1879 when he first came from Galion.

Columbus—R. B. Ackerman, Galion legislative agent for the Brotherhood of Locomotive Firemen and Engineers, was one of the five men appointed by Governor A. V. Donahey to represent Ohio at the national conference on street and highway safety in Washington March 23 to 25, under the chairmanship of the secretary of commerce.

Cleveland—Alberta Floyd, 20 years old negress, disappeared today following the shooting of her step-father, Mitchell Smith. The girl disappeared shortly after Smith died. The shooting climaxed a quarrel between Smith and his wife, police said.

HEART FAILURE

Caused Death of Mrs. Henry Metzgar—Was Sister of John J. Brehmer.

Mrs. Mary Metzger, aged 69, widow of Henry Metzger, died at her home in Columbus, Friday, February 26, of heart failure after an illness of several weeks.

Mrs. Metzger was born in Chillicothe, the daughter of Jacob and Elizabeth Brehmer and resided there until a few years ago when she moved to Columbus to be with her children.

She leaves to mourn their loss two daughters, Mrs. C. W. Pavey, Mrs. Guy Chaffin, one son, John Metzger, all of Columbus. Four brothers, John J. Brehmer of this city; Edward Brehmer, of Portsmouth and Louis and Jacob Brehmer of Chillicothe.

Funeral services were held at her home, 963 Pleasant avenue, Columbus Monday, March 1, at 2:30 o'clock. The body was placed in Amaranth Abbey, Union cemetery.

NEWS ABOUT COURT HOUSE

General Happenings Taken From the Records of the Various County Offices.

Secured Judgment.

B. R. Calvert has secured judgment by confession against Harry Barthelmas and others on a promissory note for \$429.50 at eight per cent from February 27, 1926. I. F. Snyder represents the plaintiff.

To Construe Will.

Meeker Terwilliger executor of John Banister has filed a civil action in common pleas court against Martha Phillips and others asking for the construction of the will of decedent.

HOME AGAIN.

Will G. Hamilton and Harry P. Weimer have arrived home from a visit to New Orleans, Louisiana, and the Mardi Gras. They made the trip by river and enjoyed the novelty of the ride which took them two weeks. They had plenty of eats and river water to drink.

UNDERWENT OPERATION.

Miss Anna Smallwood spent the day in Columbus, visiting her sister, Miss Marie Smallwood, a patient at Mt. Carmel hospital. The latter underwent an operation for goiter, last Friday.

MRS. THOMAS FINNESSEY DEAD.

Mrs. Jennie Amanda Fennessey, 71, died at her residence, 592 Stewart avenue, Columbus, Sunday, following a four months illness of cancer. Besides her husband, Thomas Fennessey, two brothers, Frank Rogers, of this city and William Rogers, of Columbus and one sister, Mrs. Minnie Hickey, of this city survive.

Funeral services will be held at the residence Wednesday afternoon at 2 o'clock. Rev. J. M. Chandler officiating. Burial will be in the Obitz cemetery.

QUARANTINE RAISED.

Health Officer Louis Schneider has raised the quarantine on the homes of Leroy Hampp, York street; Charles Arledge and George Arledge, Clinton street; Orlando Myers and Matthew Smith, Lovers' Lane; Jay Henry, Main and Franklin streets, and Mrs. Minerva Engle, Watt street, and has quarantined the home of Sanford Birchard, on East Ohio street. The smallpox situation is considerably better and in a short time will be stamped out.

BAR ON HER MEDAL

Mrs. Samuel Burleigh Milton, prominent in national capital society and wife of Major Milton, receiving the silver bar of honor for saving human life, from Miss Lois Thompson, representing the United States coast guard. Last year Mrs. Milton received the Coast Guard silver medal for saving life in 1922, and the bar is awarded for subsequent life saving in 1925 in the Chesapeake bay.

GOOD SALE.

The public sale of Mossbarger & Smith held Thursday near Williamsport was very well attended and property brought good prices. The sale amounted to \$4550.

W. O. Bumgarner was the auctioneer and H. W. Campbell, clerk.

RIVALS.

The whispering pine, soft speaker of the hills, is protesting against the radio, loud speaker of the city, in claiming the attention of vacationists in the Colorado Rockies.

SUDDEN DEATH OF HUSBAND AND MOTHER

Lancaster Man Fell on Street and Mother-in-Law Found Dead in Chair.

While Mrs. Edman Thomas of 349 South High street, Lancaster, was selecting a casket Saturday morning for her mother, Mrs. Louisa Hartman 82, who was found dead Friday afternoon sitting in a rocking chair at her home in Stoutsville, Ed. Thomas, 67, the husband of the Lancaster woman, dropped dead on West Main street in front of Reese's drug store Lancaster. Both deaths were caused by heart failure.

Mrs. Hartman, widow of the late Civil war veteran, Galyord Hartman, lived alone. She was seen moving about the premises but a short time before her death was discovered by Miss Jeannette Wenrich.

Mr. Thomas was a well known carpenter. He is survived by the widow, one son, Clyde, manager of the Exide Battery station and a daughter, Mrs. Ray Coss, of Locust street, Lancaster.

Mrs. Hartman is survived by two daughters, Mrs. Edward Rieman of Amanda, and Mrs. Edward Thomas, of Lancaster; four sons, George of Columbus, Frank of Clearport, Harry of Canal Winchester and John of San Antonio, Texas. A brother, Thomas Brown, of Kenton and a half sister, Mrs. Carl Walker of Lancaster, also survive.

Funeral services were held Monday from the Stoutsville Reformed church, Rev. J. M. Wenrich officiating. Burial in Maple Hill cemetery.

SHORT ILLNESS

Mrs. W. A. Valentine Passed Away Sunday—Funeral Services Wednesday.

Maria Valentine died at her home in Washington township Sunday evening at 8 o'clock after a short illness.

She was the daughter of Michael and Catherine Vallette Lutz and was born in Fairfield county, April 29, 1846. September 23, 1869, she was united in marriage to William A. Valentine and to this union were born eight children, six of whom are living, namely: Mrs. W. H. Leist, of this city; L. A. Valentine and Wilson E. Valentine, of Washington township; C. D. Valentine, of Amanda; Jennie C. Valentine, at home and Mrs. H. M. Markwood, of Lancaster.

Her husband and two children preceded her in death. She is survived by one sister, Catherine Lutz of Washington township.

She was a member of the Lutheran church and the funeral services will take place from her late residence Wednesday afternoon at 2 o'clock. Rev. G. J. Troutman will officiate. Interment in Forest cemetery.

RACHEL SWEZEY DEAD.

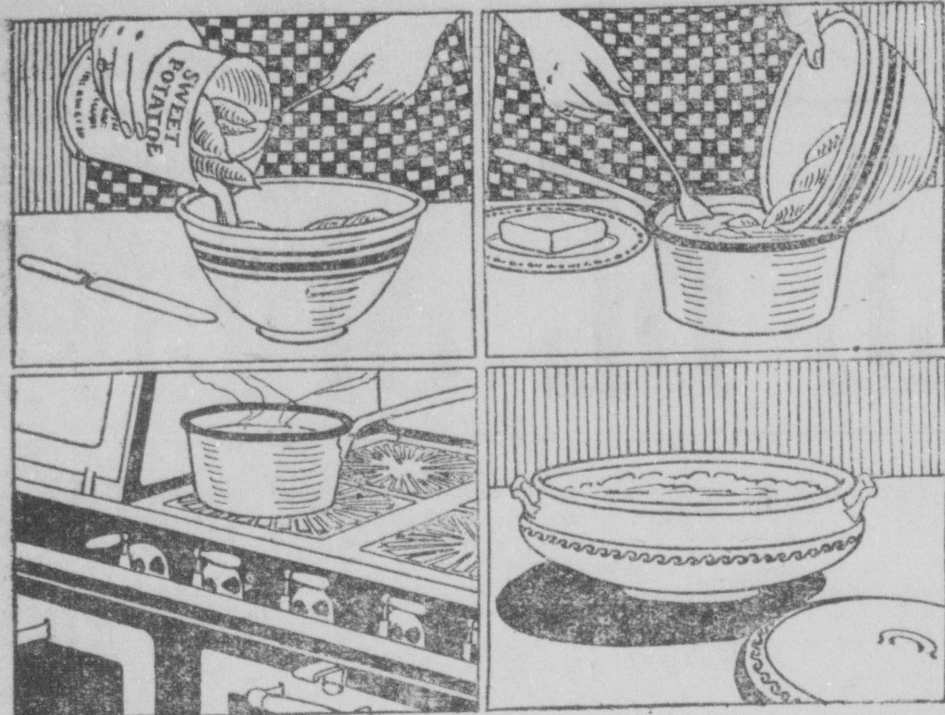

Rachel Swezey died at the County Home Sunday morning aged 78 years. She was born in Darby township and had been an inmate of the home since October 17, 1916.

The funeral services will be held at the Albaugh chapel Tuesday afternoon at 2:30 o'clock. Rev. George Weir will officiate. Interment will be in Forest cemetery.

PROSPERITY INSURANCE.

A "Prosperity Insurance" campaign to raise \$150,000 for advertising Colorado, thus protecting prosperity thru another 50-million dollar return from tourists this summer, is the unusual method of an "income" subscription drive on behalf of the state by the Denver Tourist bureau, a source of free information on travel.

Quick Dishes From Canned Sweet Potatoes

THE sweet potato has a heart of gold. But that nutritious and delectable tuber, so rich in its sweetness beneath an armor which the housewife finds hard to remove. Often she is tempted to forego its delights rather than submit to the tedious task of preparing it for the table. But, once more, modern progress has taken a tiresome job out of her hands. The sweet potato is now put up in ready-to-serve form.

Candied Sweet Potatoes is a popular dish. With the tough skin already removed by machinery, the housewife has only to slice the canned potatoes and prepare the syrup. This is done by boiling slowly for five minutes two cups of sugar and one of water. Add one heaping tablespoon of butter. Into this put the sliced sweet pota-

toes from a No. 3 can, and let them cook very slowly until the syrup has thickened almost to the consistency of candy.

Sweet Potatoes with Pineapple is another dainty. Slice all the sweet potatoes from one can, add 1/4 pound of butter, one cup sugar, one can crushed pineapple and 1/2 cup water. Bake until the syrup is thick, and serve hot.

Sweet Potato Waffles are delicious. Mash a sufficient number of canned sweet potatoes to make one cupful. Mix with one cup flour, 1/4 cup sugar, 1/2 cup melted butter and one cup milk. Add yolk of one egg well-beaten, and then the white beaten stiff. Cook like other waffles. The remainder of the can may be used for a dish of candied sweet potatoes.

The Evolution of Jack's Bean Stalk

THAT must have been a tough old bean-stalk that permitted Jack to climb to the giant's castle in the clouds. In height it out-distanced the Tower of Babel, which aimed at heaven but never got there.

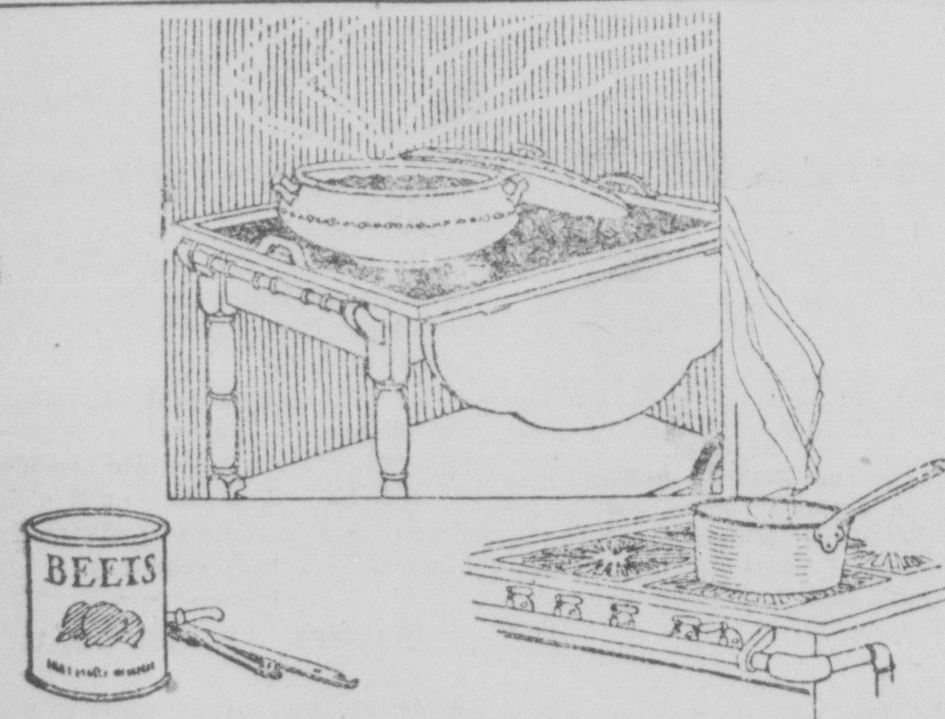

If the stringless beans we have today were as tough as those on Jack's picturesque ladder must have been, they would not be as popular as they are. The modern "stringless bean" is not one of the miracles performed by that wizard of plant life, Luther Burbank, but is an achievement of the canning industry.

Only when she buys them in a can is the housewife able to save herself the trouble of "stringing" beans. The commercial cannery, with its highly perfected equipment, has relieved her of this burden.

Now is the time to eat stringless beans, because of their remarkable cheapness. Owing to the unusually large crops, last summer, the canners put up an enormous amount of this healthful and delicious food, and therefore are selling at a great reduction, in order to reduce their large stock on hand. So the consumer is reaping the benefit. And the thrifty housewife will take advantage of the "special sales", to stock her supply with a goodly amount of stringless beans, rejoicing that she may thus practice economy and at the same time save herself time and trouble.

Besides cooking stringless beans in white sauce or butter, here is a delicious way of serving them "peasant fashion":

Simmer contents of a No. 2 size can of beans with one ham bone or a half-pound of bacon fat, for an hour. Season, and serve with vinegar. The bean's lack of fat is thus supplied.

High Food Value in Beets

BEETS are rated among the most highly nutritious of vegetables. The sugar percentage of the ordinary table beet is often as high as ten per cent. Therefore, this vegetable is a generous contributor of carbohydrates, which enter the tissues as glucose. From the oxidation of glucose in our tissues we derive more than half of our energy.

So the beet is considered one of the most important food-roots. Its vitamin content is considerable, although less than that of spinach, sauerkraut, turnips or carrots. Many palatable dishes may be quickly made from beets, as they may be purchased in ready-to-serve form and may be included in the diet in winter as well as summer. Canned beets are convenient, for they have already been

thoroughly cooked. They may be quickly diced for salad, creamed in white sauce, or served with brown butter. Many people like the addition of hot vinegar.

Beets stuffed with peas are made from canned whole beets. The large variety should be selected, and the insides scooped out with a small spoon. Drain the liquor from a can of peas and heat them in a double boiler. Drain again, add a spoonful of melted butter, salt and pepper to taste, and fill the hollowed beets with them. The portion of the beets previously removed may be cut into small pieces and mixed with the peas if desired. The filled beets should be set in the oven for a few minutes. Pour melted butter over all and serve.

EX-CONVICT

Shot His Sweetheart and Three Policemen.

Owensboro, Ky., Feb. 26.—(UP.)—This portion of Daviess county was terrorized today while an ex-convict who last night shot and wounded his former sweetheart and shot down three of four policemen who tried to arrest him, remained at large.

Jim Milburn, the ex-convict, 30 years old, is believed to be demented. He was shot through the hand by one of the patrolmen when they cornered him in his home, but escaped after wounding the three officers. According to the story told by the former sweetheart, Mary King, she had refused to accept his attentions after his return from prison. Milburn shot Miss King through the shoulder after an argument on a down town street and then fled to his home.

Patrolman Charles Hays was the only one seriously injured.

SCANS 50 YEARS OF FIGHT FOR FORESTS

Tree Association Reviews Results of Activity.

Syracuse, N. Y.—The semi-centennial of forestry occurs this year.

Charles L. Pack, president of the American Tree association, calls attention to this fact, and is celebrating the occasion by the publication of a book for free distribution, written in a popular vein, entitled "The Forestry Primer."

In 1876 a special agent was appointed by the Department of Agriculture to study forestry conditions in the United States. Since then the activities of private owners of forest land, the states and the nation have increased rapidly.

The necessity for the preservation of timber for ship building was one of the first influences that brought federal action. In 1799 congress appropriated \$200,000 for this purpose. In 1886, a division of forestry was created in the Department of Agriculture.

The forest service did not come into existence until 1905. Until that time, appropriations for forest conservation were small. The appropriations for the forest service in 1924 amounted to more than \$12,000,000.

In 1903 an intensive system for the protection of the forests against fire was established in New York state. Many steps in rapid succession followed on the part of states in the East, all looking toward forest protection, growing more forests and more careful use in logging and manufacturing of wood products.

Although the progress of forest conservation has been marked, the use and misuse of the forests has increased with greater rapidity. Records for 1924 show there were 29,000,000 acres of forest land burned over, and only about 35,000 acres planted with young trees. The disparity between construction and destruction is held to show the importance of the adoption of a complete plan for the conservation of this important resource.

Smaller Dollar Planned

The United States government has found printing paper dollars too expensive and the old silver dollar too cumbersome and heavy to be popular. For that reason a new metal dollar probably made of gold and silver much smaller and lighter in weight, is being considered.

MICKIE SAYS—

TIMES CHANGE = EDITORS WERE ONCE SO DOGGONE MODEST THAT THEY'D TRADE SUBSCRIPTIONS FOR PUMPKINS, CORD WOOD OR "WHAT HAVE YOU", AND THEN CRACK JOKES ABOUT THEIR PATCHED PANTS = THEM DAYS HAVE GONE FOREVER AND THE EDITOR PACKS AS MUCH OF A SWAGGER AS THE BANKER NOWADAYS

JOSIAH KIRBY

Jury Fixers Under Indictment—One Enters Plea of Guilty.

Cleveland, Feb. 27.—(UP.)—The Federal grand jury probing charges of jury tampering in connection with the trial of Josiah Kirby, returned two indictments today naming Ben Williamson, former Cleveland newspaperman.

The indictments charge Williamson induced James D. Donavin, former Mansfield politician, to approach two prospective jurors, Harry E. Smart, Galion, and Gustav Baer, Mansfield.

The specific charge is that Williamson "secured and induced the approach of a prospective juror."

The indictment of Williamson followed on the heels of Donavin's plea of guilty. The plea was entered after Donavin made a complete statement to Donald Van Buren, Assistant Federal District Attorney and Postal Inspector A. P. Owen.

Very Sharp Indeed

Secretary Hoover was talking about a sharp business deal.

"It was perhaps a little too sharp," he said. "It reminds me of a girl who had just broken off her engagement."

"I suppose you'll give me back my ring?" her rejected sweetheart said to her.

"No," she answered firmly. "Diamonds have gone up. I'll give you back what you paid for it."

Bulgaria to Celebrate

The Bulgarian government is preparing to celebrate the one thousandth anniversary of the founding of the kingdom and the fiftieth anniversary of Bulgaria's liberation from Turkish rule. A series of brilliant festivities and historical exhibitions will be planned. Representatives of all foreign powers will be invited by the Bulgarian government.

POULTRY FARM FOR SALE.

Three acre tract with dandy new 5 room bungalow, garage and poultry house, electric lights and gas, good walks. Well located in city limits. For further particulars and information, call or see

Circle Realty Co.,

GREECE RESTRICTS RADIO TO CITIZENS

Only Country Denying Privilege to Foreigners.

Washington.—Few countries place a ban on radio reception by foreigners; licenses are usually issued to all nationalities, except that four countries require reciprocal privileges for their nationals and one country permits only citizens to listen in. The ownership of broadcasting stations and permits to broadcast, however, are often reserved to citizens of each country.

According to recent advices from the bureau of the International Telegraph union at Berne, Argentina, Union of South Africa, Australia, Belgium, Canada, Denmark, Great Britain, Hungary, Ireland, Japan, Norway, New Zealand, Netherlands and Sweden follow the custom of the United States in permitting all to listen in; most of these countries, however, charge fees for the privileges.

Egypt and the Dutch East Indies have no broadcasting yet and consequently no regulations, while Germany, Italy, Switzerland and Czechoslovakia require reciprocity from the home governments of nations seeking receiving licenses.

Greece seems to be the only country reporting to Berne that does not permit foreigners to listen in under any circumstances, issuing such privileges only to Greek subjects.

Licenses to transmit in the United States are denied other than citizens, and this rule is followed in Germany, unless reciprocity is permitted, while New Zealand and Czechoslovakia deny the right to transmit to foreigners except in very special instances.

PUBLIC SALE

We, the undersigned, executors of the estate of Frances C. Pontius, will offer for sale at public auction on Saturday, March 6, 1926, at the late residence of Frances C. Pontius at the corner of Franklin and Washington streets in the city of Circleville, Ohio, the following goods and chattels belonging to said decedent consisting in part of large and small rugs and carpets, chairs, mirrors, pictures, cupboards, tables and table linens and wares, cooking utensils, heating and cook stoves, beds and bedding, dressers and numerous other articles.

At the same time and place at the close of the sale of the personal property we will offer the residence property located at the northeast corner of Franklin and Washington streets for sale at public auction. This property will be opened for inspection at any time up to the time of sale for any prospective buyer.

Call either of the executors or C. A. Leist, attorney for information as to terms of sale of said real estate.

Terms of sale of personal property will be made public on day of sale.

Sale to Begin at 12 O'clock Sharp,
Central Standard Time.

BIG FOUR

Protests Granting Twenty-Four Bus Applications.

Columbus, Feb. 27.—The Big Four Railroad yesterday filed 24 protests with the utilities commission against applications of that number of bus and truck operators for certificates to operate.

Most of the bus and truck concerns against which complaint was filed propose to operate over irregular routes any place in the state. The railroad contends there is no public necessity for the additional bus service proposed.

His Name Perpetuated

The humorous slang phrase, "to Bant," meaning dieting with the purpose of losing weight, originated in the making of a verb from the name Banting. Banting was the advocate of such a system, which bears his name.

LOANS UP TO \$500.00.

Where the carrying charge is added to the cost of the thing you buy and the entire amount is payable in twelve monthly payments, you pay the interest in advance for one year. Now, if you settle in six months, half the interest is unearned and should be refunded. On the other hand, if you pay for six months and the article is then taken back because you miss a payment, you usually lose all you have paid and the unearned interest besides.

It is much better for you to borrow the money and buy for cash, by using City Loan service, you establish your credit for future use, buy what you want, protect yourself during sickness or unemployment and pay the carrying charge—not in advance, but just as you go, and at practically the same rate.

TIGER FLOWERS
First Negro To Be Awarded the Middleweight Championship.
New York, Feb. 27.—(UP.)—Tiger Flowers, who is a deacon of a Baptist church down in Georgia and who works at it, is the new middleweight fighting champion of the world.
The deacon out-cuffed and out-slapped Harry Greb enough in Tex Rickard's gardens last night to win the decision of two judges and to take the title away from the faded Pittsburgh wind-mill.
Powers is the first negro to ever hold the middleweight championship and the first fighter of his color to win any title since Jack Johnson defeated Jim Jeffries for the heavyweight championship.
Flowers is 23 years of age and has been fighting for eight years. His record is not an impressive one, but it shows how hard he had to work to get up to the top. He has been through 120 fights and is credited with winning 90 of them.
There are no outstanding middleweight contenders in the class and the deacon may be around for some time.

WASHINGTON SPECIALS
Washington, Feb. 26.—(UP.)—The House appropriations committee today authorized an appropriation of \$350,000 to improve and modernize the site of the new Federal Industrial reformatory at Chillicothe, Ohio. The reformatory, now being established on the site of Camp Sherman, will be the world's most modern penal institution, Superintendent of Prisons Luther C. White told the committee. White only recently returned from an inspection tour of the reformatory.
Secretary of the Treasury Mellon announced today that persons with incomes exceeding \$5,000 will be given until May 15 to file their tax returns instead of March 15.
An appropriation bill carrying \$79,847,491 for the state, justice, commerce and labor departments for the next fiscal year was reported to the House today by the appropriations committee. The bill is \$2,253,403 in excess of current appropriations and \$59,480, less than budget estimates.

STATE DRY INSPECTOR PROBE
Columbus, Feb. 26.—(UP.)—Governor Vic Donahey this afternoon began recalling witnesses who testified before him recently in his personal investigation of law enforcement methods in use in the state prohibition department.
The witnesses were recalled in connection with charges that their testimony as previously given, had been "rehearsed" under the supervision of State Dry Inspector S. A. Propst, storm center in the investigation.
The first witness was State Dry Inspector W. D. Jones, a veteran of the dry department. He was questioned by the governor in the latter's private office. Utmost secrecy shrouded the proceedings.
Bodies and Minds
Many things have been said, and very well undoubtedly, on the subjection in which we should preserve our bodies to the government of our understanding; but enough has not been said upon the restraint which our bodily necessities ought to lay on the extravagant subtleties and eccentric ravings of our heads.—Edmund Burke.

**SCIENTISTS CHANGE
LEAD INTO MERCURY****Claim Success in Transmu-
tion of Elements.**

New York.—The Scientific American publishes with its indorsement a report claiming the successful transmutation of elements.

Drs. A. Smits and A. Krassen of the University of Amsterdam have succeeded, the periodical says, in changing lead into mercury and thallium.

Emphasis is placed upon the minute care taken to obtain the purest form of lead, in order that no suggestion might be made of the presence of the transmuted metals as an alloy or impurity.

"The success of such experiments," say Orson D. Munn, editor of the Scientific American, "delights every physicist who is interested in the new science of atomic physics. Many scientists have been seeking to demonstrate that the only difference between the different elements lies in the number and arrangement of the electrons in their atoms. Transmutation is the best kind of evidence in support of the theory."

"There is no present intrinsic value in the achievement, but it opens up for the distant future possibilities we dare not even try to predict."

The Amsterdam experiments were made with a quartz mercury vapor lamp, similar to the one used by other scientists in their attempts to convert mercury into gold, the report says.

Two Series of Experiments.

Doctors Smits and Krassen describe two series of experiments—the first of which, owing to certain complications, were indecisive, "but the second series resulted in the transmutation of the element lead into mercury and thallium."

"Since in our experiments we were investigating the quartz transmutation into mercury," they added, "it was necessary from the first to avoid a mercury air pump and a mercury manometer. Therefore the lamp employed was evacuated by a carefully cleaned metallic pump with two tubes placed in liquid air, and finally by a large vessel filled with coconut carbon. It was also cooled in liquid air, a method by which a high vacuum could be obtained."

Details of Experiment.

The procedure by which mercury was obtained follows:

The quartz lamp was filled with lead; the lead then was heated in a high vacuum until it was red hot. The lead oxide coating being completely dissociated, the surface of the liquid lead became as brilliant as mercury.

The lamp was left to burn in vacuum. The lamp was also oscillated so as to make and break the current, thus increasing its intensity. After ten hours, the strongest characteristic lines of mercury and also thallium appeared on a spectrograph. Again and again the process was repeated and each time with the same success.

In later runs, along the whole lead spectrum, the mercury lines were dominant, Doctors Smits and Krassen declared, adding:

"The striking result just gives seems to justify the expectation that if the lamp had a long enough duration of life, the point could be reached where the lead spectrum would have disappeared completely."

**Students Shave in Class,
Fighting Co-Eds' "Dolling"**

Berkeley, Cal.—The principle of equal rights for men has been established at the University of California. Prof. Ira B. Cross recently expressed annoyance at the time taken from studies by feminine students powdering their noses and freshening their countenances. He said boys had an equal privilege and rights if they desired them.

Two men appeared one day with shaving equipment and when Professor Cross started his lecture they lathered and shaved. Professor Cross led the applause, saying that if they would make their names known to him—he was unable to recognize them under the lather—he would see that they received a grade of "A" for the term.

A Sunday paper makes the best regulated living room like a theater after the audience has left.

**"HELIUM EXPRESS" TO
CARRY PRECIOUS GAS****Bureau of Mines Builds Car
to Transport It.**

Fort Worth, Texas.—The "Helium express" will be a picturesque part of war machinery. If plans of both army and navy for handling the buoyant element used in lighter-than-air craft develop according to present indications.

Disarding the tedious laboratory-like equipment now in use, the once rare gas will be rushed from base to base in long black trains of ominous-looking cylindrical tank cars, the first of which was approved recently by the bureau of explosives and is due to arrive at the United States helium plant here within thirty days.

Drawn up far enough behind the lines to be safe from hostile shells—for they will be charged to high-explosive pressure—a battery of nine or ten such cars will be able to fill a dirigible the size of the ill-starred Shenandoah.

One Car Sufficient for Blimp.

One will carry more than enough helium to inflate a blimp of the TC type, and in a fraction of the time required with the present "bottle" system of handling the gas.

Great as this step appears, it is really not as remarkable as the advance shown in the production and the handling of the gas during and since the World war. When it is recalled that, prior to 1918, less than the content of one "bottle" of 178 cubic feet capacity had been produced anywhere, the construction of tank cars capable of transporting 210,000 cubic feet each becomes less of a feat by comparison.

The history of helium development in this country is another commercial romance, tinged with the grimness of national necessity. From a business enterprise operated by two private companies, it grew to a national monopoly, the present plant having been built jointly by the army and navy, later operated by the navy alone, and now under jurisdiction of the bureau of mines, with every governmental department privileged to requisition helium for legitimate needs.

Cost of Production Cut.

The cost, once prohibitive, has come down from \$1,500 a cubic foot for the first draft produced to less than \$27 a thousand cubic feet for the \$50,000 feet a month extracted at the plant at this time.

Should items allowed for helium development in the present budget before congress prove sufficient to double the supply of natural gas, from which helium is extracted, the cost can be brought down to \$17 a thousand cubic feet, it is pointed out by E. A. Cattel, Washington, engineer of the bureau of mines in charge of helium development, who was here recently for a conference with plant officials.

Production on this basis would be at the rate of 2,000,000 cubic feet a month, or enough to fill a ship of the Shenandoah's size every four weeks. The cost of producing this amount, after the expense of laying a new pipe line had been charged off, would be little more than that of extracting the present output, said C. F. Cook, engineer in charge of production at Fort Worth.

The volume of natural gas handled would be much greater, however, for the helium content of that now available is only 1 per cent, varying a few hundredths from day to day, so that 1,000,000,000 feet of natural gas would be required monthly.

Some idea of the saving in handling and transportation costs may be gained from the fact that one of the new tank cars will replace 1,257 of the iron drums or "bottles" now in use.

**Japanese Lift Ban
on Kiss in Movies**

Tokyo.—Not so long ago the Japanese motion-picture censors permitted no picture to be shown in which there was a kissing episode.

The osculatory scenes were removed bodily because in this country kissing has always been considered extremely immoral. Of late months, however, the censors, influenced by the public, have become more liberal. Now the hero and heroine are permitted to clinch in the western fashion, and a brief kiss is allowable. But it must be brief, for if the scene becomes too ardent the censors will start using their scissors.

Home office figures show that the "love motive" in moving pictures is gaining in popularity among the Japanese fans. A report discloses that last year more of the "heart interest" pictures were imported into Japan than ever before.

More than 60 per cent of the moving pictures used in Japan are imported from Europe and America, the remaining 40 per cent being of domestic production. Japanese films have to do mostly with the historical drama, depicting brave deeds of the ancient Samurai—which may explain the 40 per cent.

Bar Wedding Gifts

Constantinople.—Wedding gifts have been abolished by the governor of Constantinople province. This is part of a program to encourage marriages and national economy.

Gobs Like Movies

Washington.—As contributing to the contentment of the navy's enlisted men movies are rated officially at 46.6 per cent, leading all other entertainments.

**The
AMERICAN
LEGION**

(Copy for This Department Supplied by the American Legion News Service.)

**SAMUEL TO ASSIST
ADJUTANT BARTON**

Frank E. Samuel of Topeka and Wichita, Kan., known nationally for his work as director of the organization and membership activities of the American Legion, was recently elevated to one of the most responsible positions in the Legion.

Under the recent consolidation plan affecting divisions of national headquarters, Mr. Samuel was named as assistant to National Adjutant James F. Barton and also director of general administration, while retaining direction of national organization and membership matters. The duties of national adjutant will be handled by Mr. Samuel in the absence or incapacity of Mr. Barton.

Mr. Samuel has one of the biggest jobs in the Legion on his hands, but his preparation for it has been long and thorough.

He began his Legion work with the inception of the organization in 1919. His first experience in Legion administration was gained as assistant department adjutant of Kansas during July

Frank E. Samuel.

and August, 1919. After sixty days as assistant adjutant, so efficient was his work, the department heads saw fit to appoint him as department adjutant. Under his regime as adjutant, from September, 1919, to February, 1924, Kansas department became one of the strongest in the Legion.

When national headquarters learned of the good work Mr. Samuel was doing out in Kansas, he was drafted to head the organization and membership division for the national organization. He began that work on February 15, 1924.

Mr. Samuel served overseas during the World conflict as an enlisted man with the Three Hundred and Fifty Third (Kansas) Infantry. He was assigned to special duty with the regimental intelligence and operations section. He attended the officers' training school of infantry at Langres, France. "But," explains Mr. Samuel, "the armistice came along before the commissions were handed out and another good 'buck' private was saved for competent kitchen police duty."

Mr. Samuel was born at Downing, Mo., December 31, 1889. He was educated at Washburn and Fairmont colleges and holds an A. B. degree from the latter. He taught English from 1912 to 1916 in Canton Christian college, Canton, China.

**Philadelphia to Have
Americanism Congress**

Philadelphia will be the scene of a great national congress of Americanism next fall. If plans authorized by the national executive committee of the American Legion are carried out.

It was suggested that a congress of all organizations interested in Americanism activities would be an especially fitting observance of the one hundred and fiftieth anniversary of the adoption of the Declaration of Independence in Philadelphia on July 4, 1776.

Holding of the congress immediately before or during the national convention of the American Legion, which meets in Philadelphia, October 11 to 15, is the plan.

National officers of the Legion, the national Americanism commission and officials of Pennsylvania and Philadelphia will co-operate in developing the plans.

In Conference

Parson Brown—How am yo' husband?

Mandy?—He am done confin' to his room.

"She" 'buff, now? Could Ah see him?"

"Mebbe so. But he am in de jail-house."—American Legion Weekly.

It Sounded That Way

"Did you show the bishop to his room, June?" asked the lady of the house.

"Yes, mum," answered the maid, "an' I left him prayin'. There was a chair put in his way before I could get the light on, mum."—American Legion Weekly.

MAYOR'S COURT

Thomas Lerch, a drunk and disorderly plead guilty and was fined \$10 and costs.

Gardner Moore, placed under arrest on the charge of being drunk and disorderly, put up \$25 for his appearance this evening.

Kenneth Linn and Edward Patterson of Columbus, plead not guilty to the charge of being drunk and disorderly and will have a hearing this evening.

x x x x x x x x
x HARTMAN THEATER. x
x x x x x x x x

Ziegfeld's most perfect musical comedy, "Louie, the 14th," will be the attraction at the Hartman theater, Columbus, Ohio, commencing next Monday night, March 1. For nine months the famous comedian, Leon Errol, and a mighty cast of singers, dancers and comedians have been delighting New York in this glorified hit, and their appearance in Columbus will be one of the notable events of the season. "Louie, the 14th," was written by Arthur Wimperis and Sigmund Romberg, the most popular composer of lovely music in the world. Riotous comedy, marvelous scenic and spectacular effects, gorgeous settings and costumes are included in the wonders of "Louie, the 14th" as well as a complete pageant and the "Homeland male chorus. Supporting Mr. Errol is a brilliant group of principals. Doris Patston was brought here especially from England to create the role of the Peach girl heroine of "Louie, the 14th." Despite her youth she had already achieved fame as one of the stars of the London Revue, "The Punch Bowl." As Colette she is the toast of the officers and their men and the center of attraction in the magnificent banquet scene. Especially interesting also is the appearance of Ethel Shutta and Pauline Mason. Miss Shutta is a gifted dancer and riotous comedienne, while Miss Mason captivates with her speed compelling "Pep" number. Included also in the superb cast are Evelyn Law, highest kicker in the world; Edna Covey, ballerine comique Florentine Cosnova, talented dancer; Simone do Bouvier and Catherine Calhoun Doucet; Glen Dale, the tenor Cosmo Bellow; Theodore Babcock, Alfred James. Then, too, are the Cosmopolitan Girls and the most beautiful chorus that Mr. Ziegfeld has ever assembled.
"Louie the 14th," is Ziegfeld's supreme achievement. It is better than "Sally" and funnier than "Kid Boots."—Matinees Wednesday and Saturday. Mail orders now.

WAYS TO PREVENT GARAGE ACCIDENTS

Caution Against Use of Cigarette and Other Flames.

In spite of the great number of accidents which have resulted from gasoline explosions, drivers and garage workers continue to do things which endanger not only their own lives, but also the lives and property of others.

It seems needless to caution against the use of matches, cigars, cigarettes and other open flames near gasoline, or near oil-soaked rags and clothing.

In drawing or pouring gasoline from one container to another, static electric sparks may be developed. It is advisable always to keep the two containers in contact with each other, or to attach a chain to the pouring container which will maintain the contact. This will lead off the electric charge and prevent sparking.

Sparks often result from striking together two pieces of metal. It is best to use kerosene instead of gasoline when cleaning oil and grease from metal parts.

Carry Fire Extinguisher.

Every motor vehicle should carry a tetrachloride fire extinguisher. For garage use probably the best fire extinguisher is one of the foam type. Never use water on a gasoline or oil fire. A mixture of sawdust and soda (about ten pounds of bicarbonate of soda to a bushel of sawdust) is good to put out oil fires. Sand is also used effectively.

The drip pan, side pans, and car in general should be kept clean and free from excessive oil. If present, excessive oil may do much to spread the flames in case of fire.

If extension cords are used for portable electric lights, it is necessary to guard against electric shock and fires resulting from electric causes. It is therefore advisable to use vapor-proof fittings, a keyless socket, lamp enclosed in a vapor-proof globe and further protected with a rigid cage to prevent breakage. It is also advisable to have armored cable instead of ordinary electric cord; this should be kept in good condition.

When it is necessary to jack up the car and get underneath, be sure the car is held up securely. Be especially careful if any of the wheels have been removed. Block the other wheels to keep them from moving. If the support should give away, the car may fall and crush you. It is best to use a pit if possible. Never depend on jacks when it is necessary to get under car. Horses are better supports than jacks, ordinary boxes or blocks. Remember, the brakes are not operative when the rear wheels are jacked up off the ground.

Avoid Carbon Monoxide.

When in the garage, the engine should not be run longer than necessary. Carbon monoxide is contained in the exhaust gases, and unless the garage is fairly well ventilated may cause headaches, other discomforts, and even death to the persons in the garage.

If you haven't a self-starter, be careful not to break your arm when cranking. Always pull the crank up, not down, and don't spin it unless absolutely necessary. When grasping crank, place thumb on same side of handle with the fingers; then if there is a kick-back, handle will slip from hand. Keep the spark retarded until the engine has started.

Be careful when working around or using rags near rotating fan.

Keep wrenches and other tools in good condition; if badly worn they should be discarded.

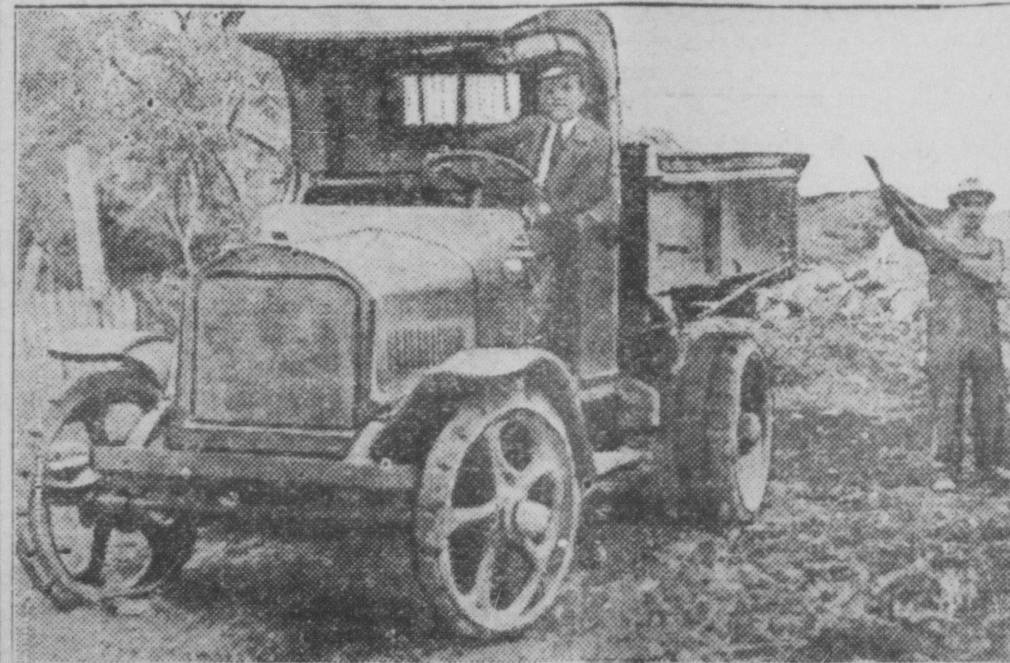

Enter and leave the garage slowly. Street car motormen, pedestrians, children, other drivers and garage workers may not be looking.

Don't drive too close to the gasoline pump at garage or filling stations and always be sure to shut off the engine when the tank is being filled with gasoline.

Cars in Canada

Canada has a registration of more than 533,000 motor vehicles. Ontario is the leading automobile owner among the provinces with 308,693 cars to its credit. The prairie provinces of Manitoba, Saskatchewan and Alberta, combined account for 166,234 automobiles. More than 60 per cent of the cars in that area are owned in rural districts.

MOTOR TRUCKS FINALLY INVADE BERMUDA

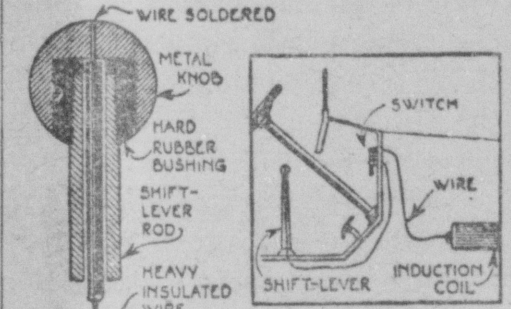

It is only recently that motor trucks have been permitted to be used on the island of Bermuda. Photograph shows a truck at work, building a road, near the bay.

Song of the Flivver
By BLAINE C. BIGLER.
I go to haunts for which you yearn,
I make a sudden sally;
I rattle, shiver, twist and turn;
I bicker down the valley.
I run, I glide, I bump, I jump;
I miss, backfire and quiver;
I overheat and skid and pump;
I shake your heart and liver.
I rattle underneath the stars;
I rumble on the bridges;
I squeak at many little jars;
I grind o'er sundry ridges.
I tremble when I go to stop;
I tremble when I'm running;
I tremble till I lose my top
And then you get a sunning.
I am the flivver, don't you know?
My way's not smooth—no never.
But cars may come and cars may go
Yet I go 'on' forever.—Farm Life.

Device for Discouraging Unauthorized Joy Riding

While many methods have been devised to prevent unauthorized joy riding, one recently installed by an electrician is especially novel.

It was done by making a special handle for the gear-shift lever with an insulating gap between the ball-shaped handle and the rod. A lead from the secondary terminal of the induction coil is brought to this ball handle through the center of the shift lever.

Device for Shocking Joy Riders.

With the engine running, any effort to shift the gears causes the full intensity of the high-voltage current to pass through the driver as his foot is on the clutch pedal completing the circuit.

The current is not injurious, but is so startling that it will unnerve and weaken the most daring thief. A cut-out switch at the edge of the cowl is carefully thrown out before the owner starts to drive.—Popular Science Monthly.

Timely Tips Will Help the Careful Car Driver

Tire chains are an almost indispensable motoring accessory in wet weather, but many a car owner has ruined his tires because he did not give the chains proper consideration.

First of all, chains should be of the proper size; not so tight as to eat into the tire's tread and side-walls nor so loose as to slip under strain. They should be adjusted to creep slightly so as to distribute the wear over the tire.

Put on chains when they are needed—no sooner and no later. And take them off as soon as the need is past. Keep them on the tires as long as they add to driving safety but not a moment longer. This advice is particularly applicable to paved highways.

Apply brakes even more cautiously when chains are being used. A sudden application of the brakes locks the wheels and often causes the chains to eat into the rubber.

To Prevent Sticking of Tires After Vulcanizing

The sticking of tires to the mold after vulcanization has always been a great source of annoyance to all repairmen. The best applications heretofore used as possible preventatives have been lacking in some respects. Therefore the discovery by a repairman of Perth Amboy, N. J., of the use of a material which overcomes this trouble will be welcomed by vulcanizers everywhere. Since the discovery is so simple, the wonder is that no one has reported it before.

So simple a substance as cocoa butter solves the problem. The method followed is this:

Clean the mold thoroughly with fine emery paper. Then after allowing it to warm up a little, go over it with a piece of cheesecloth saturated with cocoa butter. Next wipe till glossy and apply soapstone.

This method of preparing the mold has been tried in the Goodyear repair school and found to work perfectly.

AMUSEMENTS

The Paramount picture, "Wild, Wild Susan," at the Met theater is a New York story of a peppy society girl whose craving for adventure makes her the bane of her parents' existence and almost is the undoing of the city's police and fire departments.

Bebe Daniels is starred in the title role, with Rod La Rocque, as Tod Waterbury, a kindred wild, wild spirit, featured in support. From the time that Bebe complicates a traffic jam in lower Fifth avenue until as a girl sleuth, she bags a gang of "desperate bond thieves" in a haunted house, you discover that she is truly Wild Susan. Fire trucks dash out of a side street and she leads the procession at top speed thru the traffic for block after block, with cops, firemen and bystanders scared stiff.

Bebe's father tries to shift her off onto a friend by sending her abroad with him on a European tour. But one look at the insipid fellow who is to be her sailing companion brings Bebe back to earth again on the hop. She had accepted the trip with great pleasure, dreaming of the fine prospects of continuing her wild career on the other side, but just a side-glance at Eustace Waterbury and she drew the line. Eustace's older brother Tod (LaRocque) is struck by her pep and "go" as she leaps from boat to dock as the gangplank is being drawn in and follows her home in his cab. Tod had refused the trip abroad so as to continue his career as taxi driver to gather material for a novel.

Arriving home, Bebe voices her opinion of the entire Waterbury clan. Tod arrives and Bebe, never having met him, refuses to see him. When her father starts to lay down the law, she stalks out in a huff, grumbling something about going out where she can do as she chooses. She does just this when she obtains a job as a woman detective with a local agency. La Rocque is close at her heels no matter where her work leads her, introducing himself as Jay Elton Thompson, the name he uses on his books. He offers the chief of the detective agency \$1,000 if he can locate his missing "chum," Tod Waterbury and manages to get Bebe assigned to the case. From the outset the laughs come thick and fast, but at this point they start to pile up, on one another.

The final scenes at the haunted house are a riot. As events develop the whole thing is proved a frame-up engineered by Bebe's father and the detective chief to cure the girl of long ing for adventure.

"Miss Bluebeard" and "The Manicure Girl" combined don't begin to come up to "Wild, Wild Susan." It has more than a generous amount of speed, romance, pep, thrills and fast moving entertainment.

Tom Geraghty wrote the screen play from the Liberty magazine story, "The Wild, Wild Child" by Stuart Emery. A few of the big names in

the cast include Ivan Simpson, Henry Stephenson, Osgood Perkins and Russell Medcroft.

FINAL ARRANGEMENTS MADE

For House Warming Party On April 9th.

An informal meeting of members of the committees of the American Legion and Auxiliary was held at the home of Mrs. A. A. Parrett last evening and final arrangements for the housewarming party which they have planned for Friday evening, the 9th of April, were made. Committees were chosen, and other matters of importance given attention. The names of the committees will not be announced until after the next meeting of these units.

This is planned to be one of the biggest parties that has ever been held here for the purpose of raising money for the relief of the ex-service men and their families. As everyone knows the work of these organizations is directly to benefit those deserving World War veterans who have not been remembered by their Government and also to aid the Government in the matter of those already being cared for in the different hospitals which comprise the Central district.

The relief work of these organizations has gone forward steadily since their inauguration back in 1921 but outside of these who do the work, and possibly a few interested friends this work is not generally known. Only this week the auxiliary sent some clothes to Hospital No. 97 in Chillicothe. A number of canary birds were also taken to this hospital at this time as those poor unfortunate boys who are confined there are very fond of them and while giving them the care that they need are diverting their minds from their own cares and sorrows. These birds were sent through the courtesy of Mrs. A. W. Holman.

Canary birds seem to be a poor gift to send to a hospital where only men are patients but a trip to this place which only a few short years ago was a weekly and for some a daily trip, would reveal just how much appreciated this small gift would be. To be sure there are other things necessary too, and these are being sent monthly, without much display. If the work of these organizations were known and broadcast as they should be it would not be necessary to solicit members to either of them as every one who is eligible would want to be a member. A chance visitor at one of the hospitals on Christmas would very easily recognize the necessity of these organizations.

Nothing we can do for the men confined in the hospitals through disability from service is good enough for them. They have sacrificed their all for our comfort and in return many are paid with neglect, and it is to these that the Legion and Auxiliary are devoted.

When a member of the Legion or Auxiliary asks you to buy a ticket for their party on next April 9 try to recall what you feel when these truths are presented to you.

FALL VICTIM'S WIDOW TO GET COMPENSATION

Mrs. Joseph Curtis Granted Allowance For Support of Herself and Two Children.

Columbus, Feb. 27.—Mrs. Iona V. Curtis, widow of Joseph M. Curtis, who was killed Jan. 21 in a fall at the Ralston Steel Car Co., yesterday was granted a weekly workmen's compensation of two-thirds of his average weekly salary, \$19.35, for 416 weeks by the department of industrial relations.

Finds College Students Require More Thorough Health Supervision For Correction Of Injurious Habits

More thorough health supervision of college student bodies is advocated by Frederick L. Hoffman, LL. D., following a study of student health activities.

"In no direction has the modern health promoting movement made greater progress than in the health supervision of college students at certain higher institutions of learning," admits Dr. Hoffman, consulting statistician of the Prudential Insurance Company. "While this is as it should be, it is nevertheless, regrettable that so many institutions consider the subject in a superficial manner."

He points to the health work of the University of California and the University of Illinois as notable exceptions and in treating the subject in "The Spectator," ex-

presses his views on the subject. "The Spectator," ex-

Smart New Modes Introduced for Spring Wear

MME. SCHUMANN-HEINK

Returned Opera Singer Enthusiastically Received.

New York, Feb. 26.—(UP).—During all the years since 1898, when she made her debut it is doubtful if Mme. Ernestine Schumann-Heink ever received a greater ovation than that accorded her in "Das Rheingold," the vehicle for her return to the Metropolitan Opera House.

The 64-year-old singer was "among friends." The house was crowded to capacity and after she had lifted her still melodious contralto voice the audience remained to applaud and applaud.

Schumann-Heink sang a short role. She was on the stage only ten minutes. When the curtain folded many of the usually phlegmatic Wagnerian audience rushed down the aisles to the orchestra pit and cheered wildly.

But the veteran singer didn't want to take her bows alone. First she had the entire company stand with her. Then for a half dozen bows, she clutched tightly the hand of the ponderous tenor, Lubenthal, and refused to occupy the spotlight by herself, until the audience by repeated applause had forced her compliance.

All Kinds of Relics in "Courting" Couch

Ottawa, Can.—An old sofa which had been the courting place for seven daughters in the family yielded all kinds of relics when it was torn apart recently. The sofa belonged to George Blake of this city.

Blake, taking it apart for repairing, found 47 hairpins, 3 mustache combs, 46 buttons, 13 needles, 8 cigarettes, 5 photographs, 217 pins, some grains of coffee, 6 pocket knives, 15 poker chips, a bottle of headache tablets, 34 lumps of chewing gum, 9 toothpicks and 4 buttonhooks.

TRY US FOR A WANT AD

Paris Press Pokes Fun at American Women

Paris.—American women are the subject of many sarcastic comments in the French press. Here are two from daily papers:

"An American woman enters a grocery and orders a well known pick-me-up of high alcoholic strength. 'Yes, madame, a bottle?' 'No, twenty-five bottles!' 'Ah, then, it is for a bar?' 'Oh, no! For myself. I am going away for twenty-five days this month.'"

The scene of the second was a cabaret in which was a matinee idol with some woman friends, when an American woman thrust a 500-franc bill at the young actor because he refused to dance with her. This annoyed the girls with him, the story goes, and it was not merely the bill that was thrown into the undiscerning American's face.

First U. S. Treasurer

Michael Hillegas, a well-known merchant of Philadelphia, was in 1775 appointed by the Continental congress, treasurer of the United States. He held this office until 1789, when Alexander Hamilton was selected by President George Washington first secretary of the treasury. Hillegas was the son of another Michael Hillegas, who came to America from Germany.

TO TRADE JEWELS FOR FARM TOOLS

Soviet Russia Ready to Barter Treasure for Agricultural Machinery.

Moscow.—Soviet Russia is ready to turn the crown jewels of the czars, which were seized in the revolution, into American plows, tractors, and machinery. Negotiations are in progress for the sale of the vast collection of gems to American and other foreign jewelers, but it is realized that private buyers can take only a negligible portion of the treasures because of the enormous value. The government, therefore, is prepared to exchange the remainder for American agricultural machinery, locomotives, and other products Russia urgently needs.

"We want to turn the glitter of our 25,000 diamonds into the glitter of American steel," said one high official. "These magnificent jewels were bought by Russia's former tyrants with the sweat, toil, and trial of our peasants; we desire now to give them back to the peasants in the form of implements with which to till the ground, or machinery for industries. We have already turned millions of military bayonets into plow shares; we wish now to turn the imperial jewels, which are a dead asset, into tractors."

Inventory of Jewels.

The jewels date from Peter the Great to Nicholas II. They comprise 400 separate pieces of jewelry. The total weight of the diamonds alone is 25,300 carats; pearls, 6,300; sapphires, 4,300; emeralds, 3,200; and uncut rubies, 1,300.

No other historical collection of gems, whether royal or private according to the Russian officials, approaches the crown jewels, either in value or historical interest. The present collection does not represent all the Russian crown jewels, but only those covering the last 200 years.

The jewels offered for sale are appraised variously by Russian, French and Czechoslovak gem experts, but the average of their estimates is \$244,000,000, about \$50,000,000 greater than Russia's debt to the United States.

Last Rulers Moderate.

Of the 400 items in the collection, 29 per cent were supplied by Peter the Great, 40 per cent by Elizabeth, Catherine the Great, and Paul; 25 per cent by Alexander I and Nicholas; 10 per cent by Alexander II and Alexander III, and 5 per cent by Nicholas II.

So, contrary to general belief, the last czar and czarina were relatively moderate in their expenditures for crown jewels. During the last years of her life the empress was so absorbed in mysticism that she regarded the wearing of jewels as unlucky.

Conspicuous among the collection are three noble crowns. The largest of these, the "imperial crown of all the Russias," was made for the coronation of Catherine the Great in 1762. It contains 4,956 diamonds, 75 huge pearls, and many other large stones. Surmounting the crown is a superb cross of diamonds supported by an uncut ruby of 402 carats, one of the world's largest. The crown is valued at \$52,000,000.

Other principal articles are nine emblematic globes, scepters, and chains of fine craftsmanship, containing diamonds, pearls, and rubies weighing as much as 50 carats each; 23 magnificent crosses, many stars, 16 gorgeous necklaces of diamonds and pearls, 36 brooches, 10 tiaras, 9 diamond-studded lockets, 29 pairs of earrings, including one set of gigantic emeralds of 174 carats each.

Research Experts Find Radio Noise Remover

Philadelphia.—Another step forward in eliminating unwanted noise in radio receiving sets is reported by research workers in the University of Pennsylvania.

Dr. Harold Pender, dean of the Moore School of Electrical Engineering, said that in collaboration with Dr. J. H. Muller, assistant professor of chemistry, he had perfected a new noninductive, high-resistance filament to take the place of impregnated paper used widely in a grid leak.

These filaments are mounted in glass tubes. A coating of metal a thousandth of an inch thick upon a glass core gives a grid leak of uniform resistance which does not vary with weather conditions, whereas the impregnated grid leak varies as much as 100 per cent, throwing the receiving set out of perfect adjustment.

A well-adjusted grid leak prevents the tubes from "spilling over" draining off the static charge gradually and without noise.

Feeding Snakes Odd Job Held by Woman

Minneapolis, Minn.—Feeding 13 Texas diamond rattlesnakes by forcing mice down their throats and bathing the reptiles with soap and water twice a week are the duties of Miss Grace Olive Wiley, curator of the museum of the Minnesota Academy of Natural Science here.

Miss Wiley says rattlesnakes vary greatly in their temperaments, some being more sensitive and nervous than others, reacting in a different manner to the same treatment. She says the reptiles have an affectionate instinct, as all like to be stroked and petted, some showing their fondness for this attention by arching their backs like cats.

Healthy and Handy

Sauerkraut has been found rich in those "growth substances" known as vitamins, necessary to preserve and promote health. It is said to be a valuable source of iron and vegetable salts and to resemble buttermilk in its tendency to prevent the growth of harmful bacteria in the intestines. Recent scientific tests, it is claimed, have proved that sauerkraut may be preserved perfectly in the can.

No Painting From Life

More than 80 portraits of Columbus are known, but none of them was painted from life or even during the lifetime of the discoverer.

Cleveland—Police and relatives today expressed fears that Catherine Zagst, 22, Lakewood, who disappeared Thursday night, has been kidnapped.

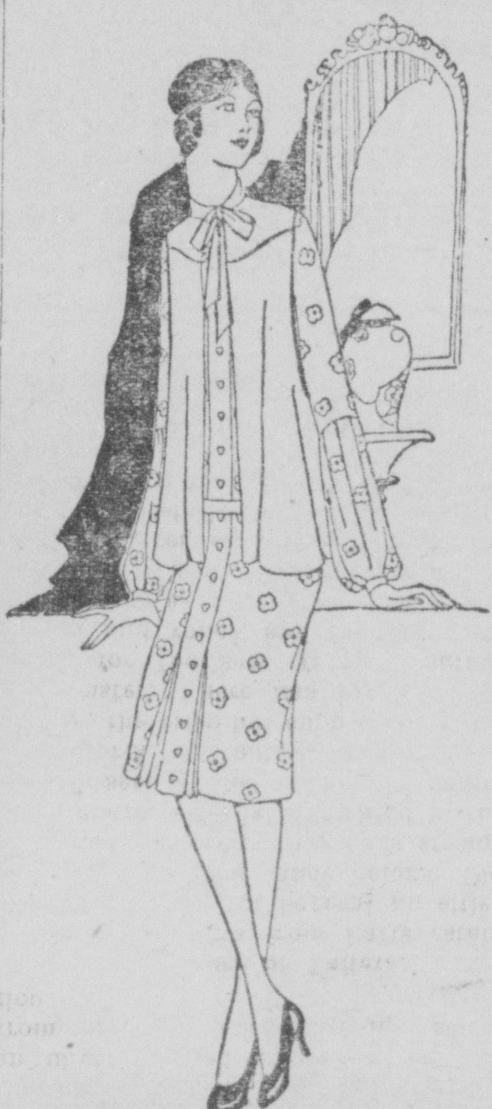

Since the girl's disappearance, a man has called the Zagst residence. He said "Catherine is ill." Police are attempting to trace the call.

Speaking of exasperating things, how about trying to smoke a busted cigar?

New Novelties in Fabric and Color

Old Favorites Also Coming Into Prominence With Late Fashions.

The variants and original treatment of certain established fashions is of unending interest, observes a fashion writer in the New York Times. The flare is presented in countless ways, creating in most of its illustrations the uneven hem line, which in a bias cut of fabric is in any event inevitable. The tube dress is elaborated by the addition of flounces, plaited girdles, panels and inserted plaits. The straight skirt is no longer necessarily plain, but is laid in a finely plaited kilt. The circular flounce need not be attached in a straight line to "cut" the figure at an awkward point, but may form deep graceful points on the hips, as shown by some of the prominent couturiers of Paris in their latest models. All efforts to discard or to "pinch" the unfitted blouse bodice having been successfully resisted, it is given variation with fine plaiting, with motifs and borders of needlework or passementerie, and in some models is slashed in front to show a vest or lining underneath. The detail of neck trimming has become a

Printed Silk, With Bolero, Circular, Extending Below Waistline.

prominent feature. The entire collection of the season's costumes presents an unprecedented number of models from which to make individual selection.

The Return of Taffeta.

The latest news from Paris establishes the vogue of several novelties in both material and color. Old favorites, too, are coming back strong, their charm already illustrated in the models seen at the fashionable southern resorts. One notices the return of taffeta, the crisp but supple kind with rich luster. There has been such a craze for the soft fabrics, satins, crepes and voiles, and for the sheer stuffs, such as cloud-like chiffons, that taffeta has been seen in only a few eccentric creations. But some of the leading artists in Paris have persisted in their endorsement of it. Lanvin's favorite period model is most happily done in taffeta. The wide skirts and bouffant effects of the Lanvin gowns have become established as a style without age or season, with a dignity and distinction reminiscent of court dress of an earlier day. Nothing in materials is more suitable than taffeta for this style of gown.

The different varieties of taffeta in weave and color are interesting. Both manufacturers and modistes are handling it with enthusiasm. In plain colors there are blue, blue from navy to Brittany and periwinkle, brown in several lovely shades, beige and, above all, gray. Soft, rich tones and plait shades have ousted more weird colors. The old-fashioned shepherd's plaid is much used in tailored and semi-tailored frocks. It is always chic, also the stripes in colors and "greige." Some delightful dance frocks are arriving from Paris, made of the newest taffetas, in wrap printed and flower patterns. Chiffon taffeta is the most suitable for evening gowns and linings for elaborate wraps. For sports suits, tussah, surrah and silk alpaca are much liked.

Sheer Fabrics.

Sheer fabrics, the filmy, delicate chiffons, the crepes and other silky weaves of nets and tulle, remain fashionable, and form the larger part of a smart wardrobe. These are shown in plain colors and in many patterns established by both foreign and domestic designers. In these, too, are many interesting revivals. One that appears to have an enduring charm, especially for women of refined taste, is the small polka dot, of which the oldest and one of the most prominent houses in this country makes a feature. This print little design is shown in both the crisp silks and the crepes, in white on color and color on white, and in many pleasant combinations of shades. Small checks, also, are much liked by some of the couturiers, who use them in the chic jumper, the tailleur and other models of informal dress. In some of these costumes a coat, and

even a hat of the small tailored style with draped crown, are made of the same material.

Interesting things are being done in combination of materials and colors. Plain crepe is used with figured crepe, or two shades of chiffon are harmoniously arranged. In some of the latest models sharply contrasting fabrics are put together. In a late Paris model, net is alternated with taffeta in wide bands to form a full skirt. Satin and chiffon are combined in a delightful afternoon gown in browns and gold. The chiffon is finely plaited, in panel godets, scarf and undersleeves. Charming results are shown in taffeta combined or garnished with lace. In picturesque dinner costume, Quaker-gray taffeta is used in pannier effect over a skirt flounced in pale yellow lace, with touches of soft rose in knots of velvet ribbon. In another gown of this description misty blue, a new shade in taffeta, is combined with silk lace on which the pattern is lightly traced with silver thread. The last word in this fancy for contrasts is a frock of black taffeta trimmed with bands and deep cuffs on the long sleeves of imitation leopard skin marked in yellow, brown and black.

In Wool and Cotton.

Among the advance styles of spring are many new models in wool and some in cotton, the latter being for morning wear. Suede cloth for a coat frock is new and luxurious. It is striking in soft brown with trimming of gilt leather. Velours and velveteen are still seen in the more elaborate costumes for wedding gowns and for dress occasions. A wedding dress lately designed in Paris for an American girl was made of white velvet embroidered in pearls and brilliants, with a train of superb rose point lace finished with a band of velvet. Another stunning wedding costume, from Worth, is in the conventional satin with flounces of point d'Alencon lace, orange blossoms and pearl embroidery.

The vogue of gray extends to every sort of costume. Some ensembles are built throughout of one shade of gray, trimmed with fur, and include the hat, shoes and gloves. A fantastic whim is expressed in an outfit of light beige marquisette for frock and cape, with a turban of draped crepe and stockings of bright red and colonial pumps of black patent leather on which are large buckles of black patent and red kid. A geranium-colored one-piece frock and coat of crepe Elizabeth is bound about the pockets, collar, cuffs, and belted with bright gilt leather. A separate coat of beige kasha to be worn with a dress of the same shade is also bound with gilded kid skin. One other especially showy model is a raglan of vivid green kasha lined with white taffeta. The rather wide sleeves are embroidered from shoulder to wrist in white zephyr and the high collar is of clipped white wool.

Styles in Sleeves.

Definite changes have been taking place in sleeves during the past two seasons. Apparently no compromise is admitted. A sleeve is long or else

Unusual Arrangements of Plaits Used on Skirt of Cape Frock.

nonexistent. Many different styles of sleeve have been introduced lately. There was the "bishop" sleeves, the modern version of the leg-o-mutton of long ago, the sleeve that was ornamented on the upper half and plain below, the flaring, bell-shaped and wide-cuffed sleeve. For evening and afternoon, several variants of the graceful sleeve were seen. But gradually many of these models were eliminated. A few of the latest sleeves are new in treatment, both smart and becoming.

Premet makes exceedingly long sleeves that almost conceal the hands. In one ultra-smart frock of sea green crepe, the long sleeve clings to the arm with a mousquetaire effect over the hand. The coat to be worn over this frock is of black kasha lined with green and has straight sleeves that widen in bell shape from the elbow downward with a narrow soft turn back cuff of the lining.

Pearls for Little Girls

Pearls for little girls come in sets consisting of bracelet and necklace. Simplicity is the keynote. Pearls of even size in the various new tints comprise these sets.

WILLIAM A. SMITH DEAD.

William A. Smith, 56, retired farmer, whose home was five miles southeast of Groveport, died Saturday at White Cross hospital, Columbus.

The funeral will be held at 2 o'clock Tuesday at the residence. He is survived by his widow, Mrs. Mary Smith; a daughter, Mrs. W. S. Badger; a son Forrest Smith, Pickaway county; a brother, Joseph Smith, Lithopolis; three sisters, Mrs. John Dum, Groveport; Mrs. Sarah Coover, Degraff, and Mrs. Stella Book, Sylvia, Kansas, and five grandchildren. The body will be placed in the mausoleum at Lithopolis cemetery.

PERSONALS

Mrs. M. B. Trout spent the day in Columbus.

Mrs. Isaiah Morris spent the day in Columbus.

Mrs. O. A. Leeson was a visitor in Columbus today.

W. H. Ours was a business visitor in Columbus today.

Walters Valentine was a business visitor in Columbus today.

George P. Kaye of Chillicothe visited friends in this city, Sunday.

Rev. A. H. Beardsley attended a ministerial meeting held at the Y. M. C. A. in Columbus today.

Mr. and Mrs. L. O. Wheat, of Columbus, were Sunday guests of Mr. and Mrs. Edward Rinehart at Williamsport.

Cyril Palm went to Pittsburgh, Pennsylvania, where he has accepted a position on the road for the Quaker Oats company.

Clark Anderson, who is representing the the Pickaway Dairy company at Welch, West Virginia, spent Sunday with relatives in this city.

David F. Niles has returned home from Venice, Florida, where he spent the winter with S. D. Riegel. The latter will not return until April.

Mrs. I. U. Finkel has returned home from Columbus where she was the guest of her granddaughter, Mrs. F. A. Mossgrrove, at 2572 Bryden road, Bexley.

ANNUAL INSPECTION.

The Pythian Sisters will hold their annual inspection Thursday evening, at 7:30 o'clock. Mrs. Ida Gillespie, of Washington C. H., will be the inspecting officer.

WHAT IS TO BE DONE?

"A very difficult question," the President calls the traffic casualties of the time. The figures that he cites—24,000 persons killed in a year upon the streets and highways of the country, and probably more than 500,000 injured. This means that over a period of the same length as our participation in the world war Americans are losing three-fourths as many lives on streets and roads as they lost to German bullets, and running up in addition a non-fatal casualty list thrice as great as they did abroad.

"The president has asked all the governors to appoint delegates to a national safety convention to assemble in March. While we know of no formula to meet the situation he has outlined the conference may write history by focusing public attention on the national aspects of a problem made up of a multitude of incidents at street corners and cross roads. Many communities are at work seeking and applying remedies.

The figures set forth in this article certainly ought to be a very convincing argument for

Columbus—Denied permission to see his wife for one year, Stanley Miller, 19, employed in Lancaster, shot himself thru the heart Sunday and died shortly after.

The Millers had been estranged and Stanley had come to the home of Mrs. Miller's foster parents to see their baby, when told he could not see his wife, he said he "would end it all," backed into the yard and fired one shot which killed him almost instantly.

Cincinnati—With three members of his family dead, John Ander, 40, and his infant daughter, Genevieve, were near death today as the result of a grade crossing crash at Elmwood Place near here during the night.

Ander's wife, Edith, 28, and son and daughter, John 14, and Hazel, 12, were killed when the train, a Pennsylvania passenger, bore down on them out of the darkness, smashing their automobile to bits.
